

MISSOURI'S ESSA CONSOLIDATED STATE PLAN

Access to a wide variety of education opportunities in safe and healthy environments improves the lives of Missouri's children creating education citizens and a competitive workforce. Missouri's ESSA Consolidated State Plan details specific strategies and initiatives the Missouri Department of Elementary and Secondary Education (MO-DESE) uses to serve all our children and accomplish this work.

Prior to the submission of MO-DESE's ESSA Consolidated State Plan, MO-DESE convened regional feedback sessions that included a wide variety of stakeholders (parents, students, community members, higher education faculty, business leaders, and community members) to participate in feedback sessions. The feedback generated by these sessions reflected a wide variety of perspectives; however, central themes emerged: Individualized learning needs, problem-based learning, and access to opportunities were noted as academic priorities. However, in all of the meetings, there was a clear sense of the importance of education in a larger societal context. Participants spoke to economic growth, engaged citizens and thriving communities as evidence of the effectiveness of public education.

Missouri's ESSA Consolidated State Plan is a component of and complement to our overall state plan under the Missouri School Improvement Program (MSIP). MO-DESE is committed to the success of all children and stands ready to assist educators and school leaders in developing and sustaining strong LEAs and schools. Missouri's children deserve high-quality educational opportunities that will prepare them for a successful future.

A. Title I, Part A: Improving Basic Programs Operated by Local Educational Agencies (LEAs)

Understanding that the purpose of Title I, Part A of Every Student Succeeds Act is to ensure that all students have a significant opportunity to have a fair and equitable, high-quality education and to close educational achievement gaps, MO-DESE provides the following information relative to this title. First, Missouri has had academic and performance standards since 1986. Core-content academic standards for some, but not all, subjects underwent revision from 2014 through 2015, prior to the directive in ESSA. New assessments aligned to the recently adopted standards were implemented on a phased-in basis beginning with the 2017-18 school year. MO-DESE completed the revision of School improvement standards as part of the Missouri School Improvement Program (MSIP) update with State Board of Education Approval in February 2020. While MSIP is often seen primarily as a tool for district accreditation, the ancillary reports provide summary analysis of achievement data for all students, subgroups (student groups) and super-subgroups (student group) for LEAs and schools. These reports can and do drive improvement for all students, helping to close educational achievement gaps. These actions and the process of annual review under MSIP are closely aligned to the purposes of Title I, Part A.

1. Challenging State Academic Standards and Assessments (ESEA section 1111(b)(1) and (2) and 34 CFR §§ 200.1–200.8.)¹
2. Eighth Grade Math Exception (ESEA section 1111(b)(2)(C) and 34 CFR § 200.5(b)(4)):

¹ The Secretary anticipates collecting relevant information consistent with the assessment peer review process in 34 CFR § 200.2(d). An SEA need not submit any information regarding challenging State academic standards and assessments at this time.

- Does the State administer an end-of-course mathematics assessment to meet the requirements under section 1111(b)(2)(B)(v)(I)(bb) of the ESEA?
 - ☒ Yes
 - ☐ No

 - If a State responds “yes” to question 2(i), does the State wish to exempt an eighth-grade student who takes the high school mathematics course associated with the end-of-course assessment from the mathematics assessment typically administered in eighth grade under section 1111(b)(2)(B)(v)(I)(aa) of the ESEA and ensure that:
 - a. The student instead takes the end-of-course mathematics assessment the State administers to high school students under section 1111(b)(2)(B)(v)(I)(bb) of the ESEA;
 - b. The student’s performance on the high school assessment is used in the year in which the student takes the assessment for purposes of measuring academic achievement under section 1111(c)(4)(B)(i) of the ESEA and participation in assessments under section 1111(c)(4)(E) of the ESEA;
 - c. In high school:
 - 1. The student takes a State-administered end-of-course assessment or nationally recognized high school academic assessment as defined in 34 CFR § 200.3(d) in mathematics that is more advanced than the assessment the State administers under section 1111(b)(2)(B)(v)(I)(bb) of the ESEA;
 - 2. The State provides for appropriate accommodations consistent with 34 CFR § 200.6(b) and (f); and
 - 3. The student’s performance on the more advanced mathematics assessment is used for purposes of measuring academic achievement under section 1111(c)(4)(B)(i) of the ESEA and participation in assessments under section 1111(c)(4)(E) of the ESEA.
- ☒ Yes
☐ No

- iii. If a State responds “yes” to question 2(ii), consistent with 34 CFR § 200.5(b)(4), describe, with regard to this exception, its strategies to provide all students in the State the opportunity to be prepared for and to take advanced mathematics coursework in middle school.

MO-DESE will continue its implementation of its “right test, right time” administration of End-of-Course (EOC) assessments, particularly in the area of mathematics.

MO-DESE’s plan encourages LEAs to offer students access to courses that prepare them for college and a career, and similarly to offer elementary students access to courses that prepare them for high school. For many students, an accelerated course pattern is optimal because it keeps them

engaged in rigorous content. Further, this approach provides subsequent flexibility in high school schedules for advanced mathematics, dual credit/enrollment coursework, and/or advanced career and technical opportunities. It is imperative that students be provided the opportunity to move into the advanced content once individual readiness has been established.

The following will be used for accountability purposes:

- Proficient Algebra I in middle school + Algebra II in high school
- Proficient Algebra I and Geometry in middle school + Algebra II in high school
- Proficient Algebra I and Algebra II in middle school + Geometry in high school
- Proficient Algebra I, Geometry, and Algebra II in middle school + plan from LEA that includes advanced math content in high school with participation in a nationally recognized high school mathematics assessment that meets the requirements in 34 C.F.R. 200.3(d).

For accountability purposes, LEAs and schools will need to determine which assessment, the Grade-Level assessment (GLA) or EOC, is the most appropriate measure for each individual student.

Students are able to participate in the assessment that is most appropriate to the content they have successfully completed at the middle school/junior high level. For example, students who take the Algebra I EOC in grade 7 and subsequently complete either Geometry or Algebra II content participate in the appropriate EOC, rather than the GLA.

The Missouri Course Access and Virtual School Program (MOCAP), that began operation in 2007, provides classes virtually on a statewide basis. Among the courses offered through MOCAP are AP classes in mathematics. MOCAP ensures that MO-DESE's approach to advanced mathematics is available to all students, regardless of the availability of classes locally.

3. Native Language Assessments (ESEA section 1111(b)(2)(F) and 34 CFR § 200.6(f)(2)(ii)):
 - i. Provide its definition for "languages other than English that are present to a significant extent in the participating student population," and identify the specific languages that meet that definition.

MO-DESE defines "languages other than English that are present to a significant extent in the participating student population" as five percent of the statewide tested population and the most prevalent language. MO-DESE's definition of tested population is the unduplicated count of students who participated in a given content assessment in the prior year. The numerator is defined as the number of students LEAs report as having a specific non-English language code in the statewide data system. Missouri's greatest reported language other than English, while below this threshold, is Spanish. This constitutes 2.41 percent of the tested

population in ELA and 2.45 percent of the population in mathematics. All other reported languages are below .25 percent of the tested population.

- ii. Identify any existing assessments in languages other than English and specify for which grades and content areas those assessments are available.

MO-DESE does not have any existing academic assessments in languages other than English.

- iii. Indicate the languages identified in question 3(i) for which yearly student academic assessments are not available and are needed.

No languages other than English meet this definition.

- iv. Describe how it will make every effort to develop assessments, at a minimum, in languages other than English that are present to a significant extent in the participating student population including by providing
 - a. The State's plan and timeline for developing such assessments, including a description of how it met the requirements of 34 CFR § 200.6(f)(4);
 - b. A description of the process the State used to gather meaningful input on the need for assessments in languages other than English, collect and respond to public comment, and consult with educators; parents and families of English learners; students, as appropriate; and other stakeholders; and
 - c. As applicable, an explanation of the reasons the State has not been able to complete the development of such assessments despite making every effort.

a. If a specific language other than English reaches the five percent threshold, MO-DESE will make every effort to develop and administer required assessments in a reasonable time frame. In the event the threshold is reached, MO-DESE will include such languages in the Request for Proposal (RFP) for assessment procurement process in accordance with State of Missouri purchasing requirements. MO-DESE will require its assessment vendors to incorporate and document industry-accepted best practices and federal peer-review requirements. Based on Missouri's statutory requirements for and recent experience with assessment development, a reasonable timeline for this process is three academic years from the issuance of the RFP to implementation.

b. MO-DESE gathered input on assessments in languages other than English as a part of the ESSA assessment work group process subsequent to the statewide meetings in the fall of 2016. Seventy-five stakeholders participated in four work group meetings in November and December regarding standards and assessments.

In addition, MO-DESE's Director of Migrant and English Language Programs and the Director of English language Development conducted three additional regional meetings, two in the fall of 2016 and one in February of 2017, to gain feedback related to the need for assessments in languages other than English.

Should language(s) other than English approach or reach the "significant extent threshold, MO-DESE will provide new opportunities for public comment and actively involve stakeholders in order to gather meaningful input.

c. Until a significant change in funding is available for assessments, the likelihood of developing high-quality assessments in other languages will remain compromised.

4. Statewide Accountability System and School Support and Improvement Activities (ESEA section 1111(c) and (d)):

i. Subgroups (ESEA section 1111(c)(2)):

- a. List each major racial and ethnic group the State includes as a subgroup of students, consistent with ESEA section 1111(c)(2)(B).

MO-DESE will continue to use the following student groups in its accountability system: Black (not Hispanic), Asian/Pacific Islander, Hispanic, American Indian/Alaska Native, White (not Hispanic), and Multi-Racial.

- b. If applicable, describe any additional subgroups of students other than the statutorily required subgroups (*i.e.*, economically disadvantaged students, students from major racial and ethnic groups, children with disabilities, and English learners) used in the Statewide accountability system.

MO-DESE does not include any additional student groups other than those statutorily required in the statewide accountability system. MO-DESE will report on other groups including Homeless, Foster, Military Dependent, and Gifted. However, these groups will not be included in accountability determinations.

- c. Does the State intend to include in the English learner subgroup the results of students previously identified as English learners on the State assessments required under ESEA section 1111(b)(2)(B)(v)(I) for purposes of State accountability (ESEA section 1111(b)(3)(B))? Note that a student's results may be included in the English learner subgroup for not more than four years after the student ceases to be identified as an English learner.

☒ Yes

☐ No

If applicable, choose one of the following options for recently arrived English learners in the State:

- ☒ Applying the exception under ESEA section 1111(b)(3)(A)(i); or
- ☐ Applying the exception under ESEA section 1111(b)(3)(A)(ii); or
- ☐ Applying the exception under ESEA section 1111(b)(3)(A)(i) or under ESEA section 1111(b)(3)(A)(ii). If this option is selected, describe how the State will choose which exception applies to a recently arrived English learner.

ii. Minimum N-Size (ESEA section 1111(c)(3)(A)):

- a. Provide the minimum number of students that the State determines are necessary to be included to carry out the requirements of any provisions under Title I, Part A of the ESEA that require disaggregation of information by each subgroup of students for accountability purposes.

MO-DESE has determined that 30 is the minimum number of students necessary to be included to carry out the requirements of any provision under Title I, Part A of the ESEA that require disaggregation of information by each group of students for accountability purposes.

- b. Describe how the minimum number of students is statistically sound.

MO-DESE uses 30 as the minimum number of students in a student group for accountability. This is consistent with Title I regulations issued on April 9, 2007.

- c. Describe how the minimum number of students was determined by the State, including how the State collaborated with teachers, principals, other school leaders, parents, and other stakeholders when determining such minimum number.

MO-DESE convened an accountability work group specifically to address accountability measures required by ESSA. The group represented teachers; librarians, district and building leaders; specialists in assessment, ESL, federal programs, special education; and charter school sponsors. The work group discussed the topic of the minimum number of students. The consensus of the group was that 30 is the advisable number for decision making and accountability.

- d. Describe how the State ensures that the minimum number is sufficient to not reveal any personally identifiable information.²

² Consistent with ESEA section 1111(i), information collected or disseminated under ESEA section 1111 shall be collected and disseminated in a manner that protects the privacy of individuals consistent with section 444 of the General Education Provisions

MO-DESE's rules around protection of personally identifiable information are based on the best practices of the National Center for Education Statistics Data Quality Campaign. Statistical analysis will exclude populations of less than 30.

- B.** If the State's minimum number of students for purposes of reporting is lower than the minimum number of students for accountability purposes, provide the State's minimum number of students for purposes of reporting.

MO-DESE's minimum number of students for reporting purposes is 5. MO-DESE's data suppression policy was revised after examining its previous reporting group size of 10 and determining that in practice, the policy suppressed more data than necessary. Lowering the reporting group size provides more transparency in the data while allowing MO-DESE to protect against unintentional disclosures.

- i. Establishment of Long-Term Goals (ESEA section 1111(c)(4)(A)):
- a. Academic Achievement. (ESEA section 1111(c)(4)(A)(i)(I)(aa))
1. Describe the long-term goals for improved academic achievement, as measured by proficiency on the annual statewide reading/language arts and mathematics assessments, for all students and for each subgroup of students, including: (1) the timeline for meeting the long-term goals, for which the term must be the same multi-year length of time for all students and for each subgroup of students in the State, and (2) how the long-term goals are ambitious.

Missouri and Missouri stakeholders seek to be competitive nationally as evidenced by input received during MO-DESE's regional meetings of 2016. MO-DESE believes that one of the most important ways to achieve that outcome is to address the rate at which students achieve success, as reflect in graduation and achievement. Said another way, MO-DESE believes that our students will be successful and competitive if we address their learning rather than simply the competitive standing of the state.

MO-DESE's strategic priorities include a focus on Early Learning, Early Literacy, and Success-Ready Students & Workforce Develop, with a goal of ensuring that all students graduate from high school ready for college, career, and life. MO-DESE currently measures progress toward this goal by examining achievement and improvement on several standards, with data aggregated at the school and LEA levels. MO-DESE's work is

Act (20 U.S.C. 1232g, commonly known as the "Family Educational Rights and Privacy Act of 1974"). When selecting a minimum n-size for reporting, States should consult the Institute for Education Sciences report "[Best Practices for Determining Subgroup Size in Accountability Systems While Protecting Personally Identifiable Student Information](#)" to identify appropriate statistical disclosure limitation strategies for protecting student privacy.

guided by a strategic plan that includes targets for academic achievement and graduation rates, as well as other metrics. MO-DESE has set a 10-year target of reducing by half the rate at which students fail to graduate. MO-DESE has set a 10-year target of reducing by half the rate at which students fail to achieve proficiency.

These targets and measures of yearly improvement are expressed in the Missouri Assessment Program (MAP) Performance Index (MPI). The MPI is a measure of achievement that examines four levels of achievement, including proficiency. An explanation of the calculation of MPI is contained in Appendix B. MO-DESE emphasizes the use of MPI for goal setting and school evaluation because it continues to value improvement. The goals are expressed primarily in terms of current and future MPI targets and proficiency rates.

Missouri's state assessments continue to be evaluated as rigorous when mapped against the National Assessment of Educational Progress (NAEP). However, MO-DESE and the stakeholders of Missouri are not satisfied that current performance indicates that all students are prepared to be competitive in their futures. We believe that cutting the rate at which all students fail to achieve proficiency, as measured by MPI scores, is a critical issue for each student and for all of Missouri. While these goals are for all students, each student group has a goal set in the same manner. The goals, expressed both in MPI and proficiency rates, are available in Appendix A as a part of the measures of interim progress.

MO-DESE notes that once the implementation of new assessments or state accountability system has been fully realized, these goals may require recalculation. The ultimate aim of reducing failure to achieve is not negotiable, but proficiency rates on the new assessment may not be comparable to the current ones.

2. Provide the measurements of interim progress toward meeting the long-term goals for academic achievement in Appendix A.
3. Describe how the long-term goals and measurements of interim progress toward the long-term goals for academic achievement take into account the improvement necessary to make significant progress in closing statewide proficiency gaps.

Long-term goals for academic achievement in Missouri are to reduce the percentage of students scoring below proficient or

advanced in both ELA and mathematics by half in the next 10 years. These goals are for all students and for each student group. By taking this approach, student groups with an average score less than that of the whole group will necessarily have a rate of improvement (reduction of percentage less than proficient) greater than the group of total.

b. Graduation Rate. (*ESEA section 1111(c)(4)(A)(i)(I)(bb)*)

1. Describe the long-term goals for the four-year adjusted cohort graduation rate for all students and for each subgroup of students, including: (1) the timeline for meeting the long-term goals, for which the term must be the same multi-year length of time for all students and for each subgroup of students in the State, and (2) how the long-term goals are ambitious.

MO-DESE's first goal in its strategic plan is that all students graduate ready for college, career and life. This goal embodies the belief that all students should graduate from high school. While readiness is addressed in MO-DESE's goals for academic achievement and college-and-career readiness, graduation rate expectations are made explicit in the metrics associated with the graduation rate goals.

The ambitious long-term goals and interim-progress measures for the four-year adjusted cohort graduation rate were established in a manner similar to the method for establishing academic achievement goals. MO-DESE has set the goal of reducing the rate of failure to graduate by half over the next 10 years. Again, parallel to the academic achievement goals, the goals for each student group is to cut the rate of failure to graduate in half over the next 10 years.

2. If applicable, describe the long-term goals for each extended-year adjusted cohort graduation rate, including (i) baseline data; (ii) the timeline for meeting the long-term goals, for which the term must be the same multi-year length of time for all students and for each subgroup of students in the State; (iii) how the long-term goals are ambitious; and (iv) how the long-term goals are more rigorous than the long-term goal set for the four-year adjusted cohort graduation rate.

Not applicable.

3. Provide the measurements of interim progress toward the long-term goals for the four-year adjusted cohort graduation rate and any extended-year adjusted cohort graduation rate in Appendix A.

4. Describe how the long-term goals and measurements of interim progress for the four-year adjusted cohort graduation rate and any extended-year adjusted cohort graduation rate take into account the improvement necessary to make significant progress in closing statewide graduation rate gaps.

MO-DESE used a similar approach to the one used for goal setting for academic achievement in setting the long-term goals and measures of interim progress for the four-year adjusted cohort graduation rate. The goal is to reduce the percentage of students failing to graduate in four years by half in the next 10 years. The goals are set similarly for each student group so that gaps will close because of differential rates of improvement. Similar to the academic achievement goals, the goals for students with disabilities are aligned to Missouri's Statewide Special Education Performance Plan but result in gap closure by the end of the ten-year window, per the requirement of coordination with other laws, including IDEA, found in ESSA.

c. English Language Proficiency. (ESEA section 1111(c)(4)(A)(ii))

1. Describe the long-term goals for English learners for increases in the percentage of such students making progress in achieving English language proficiency, as measured by the statewide English language proficiency assessment, including: (1) the State-determined timeline for such students to achieve English language proficiency and (2) how the long-term goals are ambitious.

MO-DESE has developed student-level targets, the basis for long-term goals and measures of interim progress, by reviewing research and analyzing data. The following steps were taken to establish these targets. First, a standard measure of academic English proficiency (AEP) was established. For the sake of clarity, AEP does not connote proficiency on the English language arts assessment. AEP indicates that a student is proficient in English at a level that allows them to properly use and process academic language. This is distinct from being proficient in English at an everyday functional level. Next, research was reviewed to determine rigorous yet realistic timelines for attaining AEP. Finally, data was analyzed to examine whether the research conclusions could be applied to Missouri ELs in a manner that ensured annual progress for all.

MO-DESE established that a composite score of 4.7 on the WIDA ACCESS 2.0[®] assessment constitutes AEP. This was determined through examining data analysis performed by the

WIDA Consortium. MO-DESE supplied MAP data for both ELs and English-only students to WIDA. WIDA then created a box plot analysis that allowed the comparison of MAP scale scores across subsets of students. English-only students were compared to ELs with outcomes aggregated by ACCESS 2.0[®] bracket (1=1.0 to 1.9, etc.). MAP data included both ELA and mathematics scale scores. Box plots are included in Appendix C. The box plots illustrate that ELs scoring just below the 5th level bracket (5.0-5.9), have MAP outcomes that are congruent with English-only students scoring proficient. More specifically, the top three quartiles of ELs scoring in this bracket were proficient. The exceptions to these analyses were at third grade, where an ACCESS 2.0[®] bracket score of 4.0 was congruent to English-only students, and in eighth grade mathematics, where 5.0 ELs far outperformed English-only students. The later data were skewed because eighth grade Algebra I scores were not present in the data.

To determine how quickly ELs could be expected to become AEP, MO-DESE reviewed research performed by the WIDA Consortium and the Center for Applied Linguistics (CAL). While WIDA bases its research on student outcomes from consortium members, CAL examines the same data on a nation-wide scale. MO-DESE compared outcomes for Missouri students to the CAL data. The primary conclusion was that Missouri students perform very similarly to those in the national datasets. For an English learner (EL) to become AEP, research indicates that ELs become AEP orally more quickly than they do in written form. MO-DESE does not discount the former modality but has determined to use the written form due to schools' reliance on abilities in writing. According to Hakuta, Butler and Witt (2000)³, even under the best of circumstances, attaining AEP may take four to seven years. MO-DESE has determined that student targets built on a six-year expectation, and further divided to consider length of time in an English language instructional program, provide both equity and rigor as a basis for expectations.

MO-DESE determines a starting proficiency level at the time of the first English language proficiency assessment, which is administered within five months of the student's initial identification. MO-DESE also takes into consideration grade level and time in an English language acquisition program. It is important to understand that while many other factors affect

³ Hakuta, K., Butler, Y.G., Witt, D. (2000) How Long Does it Take English Learners to Attain Proficiency? The University of California Linguistic Minority Research Institute, Policy Report 2000-1.

the rate at which learners attain AEP, they do not lend themselves to accurate or consistent data collection. Therefore, research tends to present its conclusions in ranges rather than precise time frames. The students who have received less than four years of English language instruction have different targets for AEP than those receiving four or more years. To be specific, the probability of becoming academically English proficient is less for students receiving less than four years of instruction than it is for those receiving four or more years of instruction. As a reminder, AEP indicates that a student is functional in English using academic language, not that they are proficient on the ELA assessment.

With a metric for AEP established, MO-DESE determined that it would use two mechanisms to ensure that all students made progress in acquiring the English language. First, the long-term goals and measures of interim progress in Appendix A establish increasing expectations for the entire population. Second, MO-DESE proposes an accountability structure that rewards LEAs for the progress each student makes.

2. Provide the measurements of interim progress toward the long-term goal for increases in the percentage of English learners making progress in achieving English language proficiency in Appendix A.

ii. Indicators (ESEA section 1111(c)(4)(B))

- a. Academic Achievement Indicator. Describe the Academic Achievement indicator, including a description of how the indicator (i) is based on the long-term goals; (ii) is measured by proficiency on the annual Statewide reading/language arts and mathematics assessments; (iii) annually measures academic achievement for all students and separately for each subgroup of students; and (iv) at the State's discretion, for each public high school in the State, includes a measure of student growth, as measured by the annual Statewide reading/language arts and mathematics assessments.

Indicator	Measure(s)	Description
Academic Achievement	ELA and mathematics MAP Performance Index (MAP MPI)	The academic indicator for Title I accountability will consist of single year MPIs for ELA and mathematics. The MPI scale ranges from 100 to 500. As previously mentioned, MO-DESE uses the MPI to evaluate outcomes on statewide assessments. The MPI takes into

Indicator	Measure(s)	Description
		account the achievement of students at four achievement levels. An explanation of the MPI calculation is found in Appendix B. Missouri's long-term goals and measures of interim progress are expressed primarily in MPI, with proficiency rates provided for simplicity. The use of the MPI in ELA and mathematics allows the MO-DESE to evaluate a school's performance and improvement over time as well as its distance from the state's goals. MO-DESE collects data in sufficient detail to calculate MPI for all students and for each student group.

Indicator for Public Elementary and Secondary Schools that are Not High Schools (Other Academic Indicator). Describe the Other Academic indicator, including how it annually measures the performance for all students and separately for each subgroup of students. If the Other Academic indicator is not a measure of student growth, the description must include a demonstration that the indicator is a valid and reliable statewide academic indicator that allows for meaningful differentiation in school performance.

Indicator	Measure(s)	Description
Academic Progress (Academic Growth)	MO-DESE uses the results derived from the growth calculation associated with MAP assessments in ELA and mathematics.	MO-DESE's growth calculation is a Value-Added Model (VAM) that compares individual student results to predictions based on statewide results in ELA and mathematics. MO-DESE will use a percentile ranking. Technical information on the calculation of the growth model are contained in Appendix D. Assessments are given annually and growth results are calculated annually as well. Results can be disaggregated for all student groups required by ESSA.

- b. Graduation Rate. Describe the Graduation Rate indicator, including a description of (i) how the indicator is based on the long-term goals; (ii) how the indicator annually measures graduation rate for all students and separately for each subgroup of students; (iii) how the indicator is based on the four-year adjusted cohort graduation rate; (iv) if the

State, at its discretion, also includes one or more extended-year adjusted cohort graduation rates, how the four-year adjusted cohort graduation rate is combined with that rate or rates within the indicator; and (v) if applicable, how the State includes in its four-year adjusted cohort graduation rate and any extended-year adjusted cohort graduation rates students with the most significant cognitive disabilities assessed using an alternate assessment aligned to alternate academic achievement standards under ESEA section 1111(b)(2)(D) and awarded a State-defined alternate diploma under ESEA section 8101(23) and (25).

Indicator	Measure(s)	Description
Graduation Rate	Four-year graduation rate	Student demographics are included in the annual cycle of data collection and results can be disaggregated by student group. MO-DESE will average the most recent three years of graduation rates. Missouri does not have a state-defined alternate diploma. Section (v) of question c. is not applicable in Missouri.

- c. Progress in Achieving English Language Proficiency (ELP) Indicator.
Describe the Progress in Achieving ELP indicator, including the State's definition of ELP, as measured by the State ELP assessment.

Indicator	Measure(s)	Description
Progress in Achieving English Language Proficiency	MO-DESE will employ an English Acquisition Index (EAI) that credits schools for the percentage of students attaining AEP and growth on WIDA ACCESS 2.0®.	MO-DESE has developed an index score that provides an incentive for schools to address the needs of English learners by including two factors in the index. An explanation of this index is found in Appendix A. The total scale of this indicator ranges from 0 -200. The first factor credits schools for the percentage of students achieving AEP. This factor is given 50 points. The second factor credits schools for the growth shown by each EL on WIDA ACCESS 2.0® as shown in Appendix A. This factor is given up to 150 points.

- d. School Quality or Student Success Indicator(s). Describe each School Quality or Student Success Indicator, including, for each such indicator: (i) how it allows for meaningful differentiation in school performance; (ii) that it is valid, reliable, comparable, and statewide (for the grade span(s) to which it applies); and (iii) of how each such indicator annually measures performance for all students and separately for each subgroup of students. For any School Quality or Student Success indicator that does not apply to all grade spans, the description must include the grade spans to which it does apply.

Indicator	Measure(s)	Description
i. School Quality or Student Success	The percentage of students attending school 90% of the time.	One year of data will be used to determine the percent of students attending school at least 90% of the time.

- iii. Annual Meaningful Differentiation (ESEA section 1111(c)(4)(C))
- a. Describe the State's system of annual meaningful differentiation of all public schools in the State, consistent with the requirements of section 1111(c)(4)(C) of the ESEA, including a description of (i) how the system is based on all indicators in the State's accountability system, (ii) for all students and for each subgroup of students. Note that each state must comply with the requirements in 1111(c)(5) of the ESEA with respect to accountability for charter schools.

MO-DESE will calculate an index score based on all the indicators of the accountability system. The index will be calculated for all schools. This index score will be used for improvement identification purposes for schools receiving Title I, Part A funds. The index will also be calculated for each student group of 30 or greater present in each of those schools.

1. Academic Achievement (Assessment Status) – MO-DESE will collect the MPIs for ELA and mathematics and rank the resulting average MPI. percentile rank will be calculated for each school. The calculated will be multiplied by two for each content area.
2. Student Progress (Assessment Growth) – MO-DESE will collect for ELA and mathematics derived in the growth model calculation. The resulting percentile will be multiplied by three.
3. Graduation Rate – MO-DESE will rank the three-year average graduation rates and be multiplied by three.
4. English language acquisition – MO-DESE will assign up to 50 points for meeting the rate at which students become AEP on WIDA

ACCESS 2.0[®], and 150 points for gains on the WIDA ACCESS 2.0[®]. These total points will be ranked and NCEs calculated. The NCE will be multiplied by two.

- 5. Student Success/School Quality – MO-DESE will measure attendance, defined as the percentage of students attending at least 90 percent of the time. Attendance rates will be ranked.

The resulting calculations will be summed to arrive at the Accountability Index Score. Schools will be ranked on their respective index scores and the lowest five percent of schools receiving Title I funds. The highest index score of the lowest five percent of schools will establish the Identification Threshold for that year.

In addition to identifying the lowest-performing five percent of schools receiving Title I, Part A funds, MO-DESE will identify any high school that fails to graduate at least two-thirds of its seniors for Comprehensive Support and Improvement.

In cases where ELs are not present or present in numbers below which calculation is possible, the remaining standards will be weighted by redistributing the points associated with that indicator. Academic Progress and Graduation Rate will be multiplied by 3.75, and Attendance by 1.25.

In order to identify schools with low performing student groups, each student group identified in 1111(c)(2), including students who are economically disadvantaged, students from major racial and ethnic groups, children with disabilities, and ELs, will then be treated as if they were their own building and examined using the same accountability structure. These student group calculations will be subject to n size restrictions and will be pooled if necessary. Those schools with student groups whose index score is at or below the Identification Threshold (lowest five percent) will be identified for Targeted Support and Improvement.

- b. Describe the weighting of each indicator in the State’s system of annual meaningful differentiation, including how the Academic Achievement, Other Academic, Graduation Rate, and Progress in ELP indicators each receive substantial weight individually and, in the aggregate, much greater weight than the School Quality or Student Success indicator(s), in the aggregate.

The indicators will be weighted as follows:

Indicator	EL present	EL fewer than 30 (minimum N)
Academic Achievement	4	5

Indicator	EL present	EL fewer than 30 (minimum N)
English Language Arts (2/2.5*)		
Mathematics (2/2.5*)		
Academic Progress / Grad. Rate	3	3.75
English Language Acquisition	2	-
Progress to Proficiency (1.5)		
AEP Attainment (.5)		
Attendance	1	1.25
Total Weighting	10	10

Sample

Academic Achievement	Value	Percentile Rank	Weight	Index Score
ELA MPI	375.8	0.58	2	1.16
Mathematics MPI	391.2	0.63	2	1.26
				2.42
Academic Progress				
ELA Growth	0.345	0.60	1.5	0.9
Mathematics Growth	0.511	0.78	1.5	1.17
				2.07
English Language Acquisition				
Progress to Proficiency	102	0.73	1.5	1.095
AEP Attainment			.5	
Attendance	.92	.9	1	1.5
Total				

MODESE uses the 2.5 weighting for English language arts and mathematics in the event that the school has an EL student group that is not of sufficient size or does not serve an EL population.

- c. If the States uses a different methodology for annual meaningful differentiation than the one described in 4.v.a. above for schools for which an accountability determination cannot be made (*e.g.*, P-2 schools), describe the different methodology or methodologies, indicating the type(s) of schools to which it applies.

MO-DESE will include one additional statewide category of schools. This category of schools will be composed of schools that would otherwise be included in Comprehensive Support and Intervention that administer no assessments (MAP grade level assessments or WIDA ACCESS 2.0®) and have only a single indicator of school quality

or success. In this example, schools will have only attendance data available to make a determination about identification. If a school that administers no assessments has an attendance rate consistent with the schools identified for comprehensive support and improvement, MO-DESE will assign an Area Supervisors of Instruction (ASI) to further analyze the school before identification. At a minimum, analysis will be based on a site visit and analysis of students' academic outcomes in subsequent grade levels. Following analysis, the school will be identified for improvement if advisable.

iv. Identification of Schools (ESEA section 1111(c)(4)(D))

Comprehensive Support and Improvement Schools. Describe the State's methodology for identifying not less than the lowest-performing five percent of all schools receiving Title I, Part A funds in the State for comprehensive support and improvement, including the year in which the state will first identify schools.

MO-DESE's methodology for identifying schools for Comprehensive Support and Improvement will result in the identification of schools that are

1. among the lowest five percent of schools receiving Title I funds, based on the indicators outlined above;
2. high schools with an average four-year adjusted cohort graduation rate less than 67 percent over a period of three years; or
3. Title I schools that fail to meet the exit criteria as a school identified for Additional Targeted Support and Improvement.

The method for annual meaningful differentiation above will result in scores for every school receiving Title I funds. MO-DESE will rank the schools by these scores and identify the lowest-performing five percent of schools from the ranking. There will be approximately 62 schools identified under this method. The schools will be identified for Comprehensive Support and Improvement.

Comprehensive Support and Improvement Schools. Describe the State's methodology for identifying all public high schools in the State failing to graduate one third or more of their students for comprehensive support and improvement, including the year in which the state will first identify schools.

Any public high school that fails to graduate one third or more of its students for three years will be identified for Comprehensive Support and Improvement.

Comprehensive Support and Improvement Schools. Describe the methodology by which the State identifies public schools in the State

receiving Title I, Part A funds that have received additional targeted support under ESEA section 1111(d)(2)(C) (based on identification as a school in which any subgroup of students, on its own, would lead to identification under ESEA section 1111(c)(4)(D)(i)(I) using the State's methodology under ESEA section 1111(c)(4)(D)) and that have not satisfied the statewide exit criteria for such schools within a State-determined number of years, including the year in which the state will first identify schools.

If schools are identified for targeted support and improvement and receive additional targeted support yet fail to meet the state's exit criteria in three years, then those schools will be identified for Comprehensive Support and Improvement.

- a. Frequency of Identification. Provide, for each type of schools identified for comprehensive support and improvement and the frequency with which the State will, thereafter, identify such schools. Note that these schools must be identified at least once every three years.

MO-DESE will review the data used to identify schools on a yearly basis using the identification method to determine the progress of previously identified schools. MO-DESE will identify schools for Comprehensive Support and Improvement Every three years. Title I schools that have failed to meet the criteria for exiting Additional Targeted Support and Improvement status will be identified as Comprehensive.

Targeted Support and Improvement. Describe the State's methodology for annually identifying any school with one or more "consistently underperforming" subgroups of students, based on all indicators in the statewide system of annual meaningful differentiation, including the definition used by the State to determine consistent underperformance. (*ESEA section 1111(c)(4)(C)(iii)*)

In accordance with federal law, schools in which a student group's performance is consistent with schools identified for Comprehensive Support and Improvement for two consecutive years will be identified as having one or more consistently underperforming student groups. MO-DESE will run each school and all student groups previously identified through the same calculation used for original identification to determine the progress in order to make a determination about whether the school needs to be placed on the list of schools identified for Targeted Support and Improvement.

- b. Additional Targeted Support. Describe the State's methodology, for identifying schools in which any subgroup of students, on its own,

would lead to identification under ESEA section 1111(c)(4)(D)(i)(I) using the State's methodology under ESEA section 1111(c)(4)(D), including the year in which the State will first identify such schools and the frequency with which the State will, thereafter, identify such schools. (ESEA section 1111(d)(2)(C)-(D))

Again, in accordance with federal law, any school that has one or more student groups which, on its own, would lead to identification for Comprehensive Support and Improvement will be identified for Additional Targeted Support. Schools will be identified every two years. MO-DESE will evaluate this data on an annual basis as described previously to determine each individual school's current status.

- c. Additional Statewide Categories of Schools. If the State chooses, at its discretion, to include additional statewide categories of schools, describe those categories.

MO-DESE will include one additional statewide category of schools. This category of schools will be comprised of schools that would otherwise be included in Comprehensive Support and Intervention that administer no assessments (MAP grade level assessments or WIDA ACCESS 2.0[®]) and have only a single indicator of school quality or success. In this example, schools will have only attendance data available to make a determination about identification. If a school that administers no assessments has an attendance rate consistent with the schools identified for Comprehensive Support and Improvement, MO-DESE will assign an ASI to further analyze the school before identification. At a minimum, analysis will be based on a site visit and analysis of students' academic outcomes in subsequent grade levels. Following analysis, the school will be identified for improvement if advisable.

- v. Annual Measurement of Achievement (ESEA section 1111(c)(4)(E)(iii)): Describe how the State factors the requirement for 95 percent student participation in statewide mathematics and reading/language arts assessments into the statewide accountability system.

Participation on state assessments will remain a primary component of MO-DESE's accountability system. All LEAs, schools and student groups will be required to assess at least 95 percent of their students on assessments required by the MAP.

Any school with less than a 95 percent participation rate in ELA or mathematics will automatically fail to earn points for academic achievement in the state's system for meaningfully differentiating schools. MO-DESE will utilize the same criteria for any student group(s),

including students with disabilities and ELs, for which the rate falls below 95 percent.

vi. Continued Support for School and LEA Improvement (ESEA section 1111(d)(3)(A))

a. Exit Criteria for Comprehensive Support and Improvement Schools.

Describe the statewide exit criteria, established by the State, for schools identified for comprehensive support and improvement, including the number of years (not to exceed four) over which schools are expected to meet such criteria.

A school identified as Comprehensive Support and Improvement status will exit that status upon meeting the following:

- For Schools Identified based on Graduation Rate:
 - The school has demonstrated that it no longer meets the criteria for identification by demonstrating a 4-year cohort graduation rate of above sixty-seven percent for three consecutive years.
- For Schools Identified in Bottom 5%:
 - The school no longer meets the criteria for identification; and
 - The school demonstrates at least two years of on-going improvement, as evidenced by improved proficiency rates for English language arts and mathematics.
- For Schools Identified as Comprehensive based on not exiting ATSI status:
 - The school no longer meets the criteria for identification; and
 - The group or groups that served as the basis for identification demonstrate progress on proficiency rates in ELA and mathematics. For example, a school's data from school year 2017-18 would be used to identify the school as a CSI school in the fall of 2018.

For example, if a school is designated as CSI for graduation rate and bottom 5% that school would have to meet the exit criteria for both designations before completely removing CSI status.

b. Exit Criteria for Schools Receiving Additional Targeted Support.

Describe the statewide exit criteria, established by the State, for schools receiving additional targeted support under ESEA section 1111(d)(2)(C), including the number of years over which schools are expected to meet such criteria.

MO-DESE's uniform statewide exit criteria for a school identified for targeted support and improvement will require that the identified student group(s) continue to demonstrate improvement in proficiency rates or MPI in ELA and Mathematics student group. For example, if a school is identified for improvement because students with disabilities, when treated as if they constituted a building, and if the

same student group achieved improvement in two MPI per year for two of three years, the school would meet the exit criteria.

- c. More Rigorous Interventions. Describe the more rigorous interventions required for schools identified for comprehensive support and improvement that fail to meet the State's exit criteria within a State-determined number of years consistent with section 1111(d)(3)(A)(i)(I) of the ESEA.

At initial identification, Comprehensive Support and Improvement schools will have conducted a needs assessment based on accountability and any other relevant data. As a part of the initial improvement process, the LEA will have selected evidence-based interventions related to the areas of focus identified by the needs assessment. Additionally, MO-DESE will have required participation in professional development associated with high-effect-size teaching and instructional practices. MO-DESE Area Supervisors of Instruction (ASIs) will have met monthly to monitor accountability plan implementation through the existing Regional School Improvement Team (RSIT) process.

Schools that have not met the exit criteria after year three or have not shown improvement as determined by MO-DESE will first undergo an analysis of why the original interventions did not produce the desired results. The analysis will be conducted in partnership with MO-DESE staff. This analysis will inform a new comprehensive needs assessment. MO-DESE may require that this needs assessment be conducted in partnership with or wholly by an entity outside the LEA with expertise in school improvement. The level of evidence for the selected interventions will necessarily be more rigorous than those originally selected. MO-DESE will engage school improvement specialists, to meet on a monthly basis with the schools requiring more rigorous interventions. These specialists will provide principal coaching and will closely monitor the fidelity of intervention implementation using 30-, 60-, and 90-day action plans.

- d. Resource Allocation Review. Describe how the State will periodically review resource allocation to support school improvement in each LEA in the State serving a significant number or percentage of schools identified for comprehensive or targeted support and improvement.

MO-DESE will review the Annual Secretary of the Board Report (ASBR) each year to determine that resource inequities do not exist at the building level in LEAs with buildings identified for Comprehensive or Targeted Support and Improvement.

MO-DESE will report resource allocations at the LEA and building level on the appropriate Annual Report Card.

- e. Technical Assistance. Describe the technical assistance the State will provide to each LEA in the State serving a significant number or percentage of schools identified for comprehensive or targeted support and improvement.

Fair, flexible and focused accountability and support systems are critical to continuously improving the academic achievement of all students, closing persistent achievement gaps and improving equity. Missouri's Statewide System of Support (SSOS) is the primary mechanism employed by MO-DESE to hold LEAs and schools accountable for achievement and to provide accountability and differentiated support to all LEAs. It is also through the SSOS that schools receive targeted technical assistance in developing and implementing accountability plans. This system includes evidence-based interventions that support improved student achievement, graduation rates and closing achievement gaps for all student groups. It allows for MO-DESE to focus its efforts on schools identified for Comprehensive Support and Improvement, while also providing a standard level of support and accountability to all LEAs and schools.

To ensure that LEAs and/or schools are implementing the requirements for schools identified for Comprehensive Support and Improvement, the SSOS will provide ongoing support for and monitoring of the implementation of the activities identified above. The SSOS will conduct site visits to

- promote and develop the school's responsiveness to internal accountability;
- monitor and document indicators of progress pertinent to the district and/or building plans;
- gather data specific to the school;
- identify promising practices; and
- provide specific and timely feedback to the principal and other LEA staff.

The SSOS will assist in the development of a timeline for improvement and the planning of high-quality, evidence-based professional development focused on strategic instructional strategies that will result in increased language proficiency and improved academic results for ELs and students with disabilities.

MO-DESE is dedicated to focusing resources on ensuring that an excellent educational system is accessible to all Missouri students. This means holding each LEA and school accountable for student

outcomes along the students’ journey in preparation for postsecondary success. If a school is not demonstrating the expected outcomes for students, MO-DESE will intervene on behalf of the students with rapid and targeted interventions. The intervention system includes tools and strategies to build capacity at the LEA level to improve both schools and the entire system. There are four fundamental principles underlying Missouri’s SSOS:

1. Students cannot wait for incremental improvement in their educational conditions.
2. The process of targeted intervention requires a systematic evaluative focus on implementation, dedicated project management and instructional improvement support.
3. Monitoring progress in LEAs and schools must be based on outcomes.
4. Collaboration between and among stakeholders is essential for sustainable improved student learning.

MO-DESE will provide dedicated supports specifically to those schools that have been identified for comprehensive support and improvement. Schools identified for Targeted Support and Improvement will have access to the same tools. However, personnel support will be limited by resources. Those schools will participate in a similar process with their RSIT:

Step	Action
Pre-Implementation	Activities begin to relay expectations of contracted staff that will be working with the identified school to implement the accountability plan.
School Leadership	School/LEA staff implements a 30-day planning process. This process is used by the principal and contracted staff to give special attention to the opening of the school year. Principals must identify key early wins and clarify adult and student behaviors that are in need of improvement. Contracted staff/RSIT leader, LEA and building level leaders meet every other month to discuss school climate and culture and, implementation of the accountability plan, as well as to review specific data that is pertinent to plan implementation. These meetings focus on the use of data to show evidence of implementation and the impact on critical indicators of improvement.

Step	Action
	School leader is assisted in the use of perceptual data that is collected and the setting of short- and long-term goals. Regional staff provides on-site coaching for building principals and other members of the school's leadership team.
Effective Instruction	• Site visits are conducted by contracted staff with knowledge of the region. Site visits include classroom observations which provide feedback to the leadership team on the following: student learning objectives, complexity of the instruction, engagement of teachers and students, content, classroom management and assessment, and instruction practices. • School leaders are debriefed to discuss and review observations. Written and verbal feedback is provided. • Contracted staff work with school leaders to use the data generated by their own classroom walkthroughs and observations to map the effectiveness of their staff.
Teacher/Leader Effectiveness	• Schools utilize the Missouri teacher/leader standards and evaluation protocols that align with the Seven Principles of Effective Evaluation. • School Leaders use mapping procedures to analyze the abilities and effectiveness of each staff member. The school leader and leadership team use this tool to assess the strengths and weaknesses in order to determine the intensity of support necessary to improve instructional practice and make informed personnel decisions.
Data Teams (utilization)	• Monthly progress reports (running record) are used to capture the work that is being done to address the improvement targets in the accountability plan. These reports are used in the monthly meeting. • Data dashboards are used to display critical data and include school-

Step	Action
	specific indicators, behaviors and practices.
Climate/Culture/Collaboration	- Contracted staff/RSIT, LEA and school leadership conduct an on-site visit prior to plan implementation to review climate and culture. - School leader must create a culture of high expectations for students and adults. - School leaders with assistance of contracted staff/RSIT and LEA staff redesign instructional time to allow collaborative teaming opportunities.
Statewide Professional Development Opportunities	A summit is held to focus on critical needs of all identified schools (i.e. literacy).

- f. Additional Optional Action. If applicable, describe the action the State will take to initiate additional improvement in any LEA with a significant number or percentage of schools that are consistently identified by the State for comprehensive support and improvement and are not meeting exit criteria established by the State or in any LEA with a significant number or percentage of schools implementing targeted support and improvement plans.

Disproportionate Rates of Access to Educators (ESEA section 1111(g)(1)(B)): Describe how low-income and minority children enrolled in schools assisted under Title I, Part A are not served at disproportionate rates by ineffective, out-of-field, or inexperienced teachers, and the measures the SEA agency will use to evaluate and publicly report the progress of the State educational agency with respect to such description.⁴

Missouri recognizes that inequities exist in students' access to great teachers and school leaders across the United States. Students of color, students from low-income families, rural students, students with disabilities, students with limited English proficiency, and students who struggle academically are less likely than their peers to have such access. The causes of these inequities vary from place to place and context to context, with numerous policy, practice, economic and socio-cultural factors at play. Because of the multiple causes for inequity in teacher and leader distribution, the solutions must be systemic rather than merely treating the symptoms.

Providing systemic solutions to equity gaps begins with an analysis of data. What follows is a comparison of data of minority and low-income children enrolled in schools assisted under Title I, Part A to all students in the state.

⁴ Consistent with ESEA section 1111(g)(1)(B), this description should not be construed as requiring a State to develop or implement a teacher, principal or other school leader evaluation system.

The data table below indicates the rates at which low-income and minority students enrolled in Title I schools are served by inexperienced and out-of-field educators as compared to all students in other non-Title I schools. The rates of service by the third category of educators addressed under the disproportionality requirements of ESSA, those deemed to be ineffective, cannot be calculated at this time.

SY2022

Missouri	2022							
	Title I				Non-Title I			
	High > 75% Minority		High > 75% Poverty		Low < 25% Minority		Low < 25% Poverty	
TEACHERS	Number of Teachers	Percentage of Teachers	Number of Teachers	Percentage of Teachers	Number of Teachers	Percentage of Teachers	Number of Teachers	Percentage of Teachers
Inexperienced Teachers	9139	11.3%	8169	10.1%	4853	6.0%	3316	4.1%
Out-of-Field Teachers	14558	18.0%	12294	15.2%	10191	12.6%	4691	5.8%
Ineffective Teachers	2157	2.8%	1310	1.7%	385	0.5%	154	0.2%
PRINCIPALS	Number of Principals	Percentage of Principals	Number of Principals	Percentage of Principals	Number of Principals	Percentage of Principals	Number of Principals	Percentage of Principals
Inexperienced Principals	N/A	15.5%	N/A	15.4%	N/A	10.9%	N/A	8.1%
Out-of-Field Principals	N/A	10.3%	N/A	9.3%	N/A	7.6%	N/A	2.5%

MO-DESE will also monitor LEA data submitted through the MOSIS/Core Data System through MOSIS/Core Data Screen 18A to confirm the accuracy of assurances by LEAs that low-income and minority children enrolled in schools assisted under Title I, Part A are not served at disproportionate rates by ineffective teachers. MO-DESE provides a model Educator Evaluation System for LEA and school use. Using MO-DESE's model, a teacher cannot be considered effective if any one of the following three criteria exist (see page 3 of the Summative Evaluation Form, Appendix F):

1. There is a significant area of concern initiating an improvement protocol.
2. There is less-than-expected performance by the teacher, as determined by years in the current position, on quality indicators selected by the LEA or school.
3. Student growth targets have not been fully met.

LEAs that elect not to use the MO-DESE's model Educator Evaluation System must align their local process to the Essential Principles of Effective Evaluation approved by the State Board of Education and effective April 30, 2014. There are seven principles

1. Performance of educators is measured against research-based, proven expectations and performance targets consistent with the improvement of student achievement.
2. Multiple ratings are used to differentiate levels of educator performance.
3. A probationary period of adequate duration is provided to ensure sufficient induction and socialization through developmental support for new teachers and leaders.
4. Measures of growth in student learning across two points in time are included as a significant contributing factor in the evaluation of professional teacher and leader practice at all levels.
5. Ongoing, timely, deliberate and meaningful feedback is provided on teacher and leader performance relative to research-based targets.
6. Standardized, periodic training is provided for evaluators to ensure reliability and accuracy.
7. Evaluation results and data are used to inform decisions regarding personnel, employment determinations and human resource policies such as promotion, retention, dismissal, tenure, compensation, and so forth.

At the conclusion of each academic year, an LEA submits building-level data on the alignment of their local evaluation process to the Essential Principles of Effective Evaluation. This submission of data occurs for all schools, including those assisted with Title I, Part A funds. Schools must identify the number of performance levels in their local evaluation process and teachers rated in each of these levels. The lowest level are those categorized as ineffective teachers. This performance data is used to confirm assurances provided by schools assisted under Title I, Part A that low-income and minority children enrolled in are not served at disproportionate rates by ineffective teachers. Based on these assurances and school-level data submitted through the MOSIS/Core Data Collection System and reviewed through the federal programs monitoring process,, MO-DESE will monitor and publicly report on the degree to which low-income and minority children enrolled in schools assisted under Title I, Part A are served at disproportionate rates by ineffective, out-of-field, or inexperienced teachers and the progress toward reducing those rates to negligible levels at the following URL address on the MO-DESE site:

<https://dese.mo.gov/educator-quality/equitable-access-excellent-education>

2. School Conditions (*ESEA section 1111(g)(1)(C)*): Describe how the SEA agency will support LEAs receiving assistance under Title I, Part A to improve school conditions for student learning, including through reducing: (i) incidences of bullying and harassment; (ii) the overuse of discipline practices that remove students from the classroom; and (iii) the use of aversive behavioral interventions that compromise student health and safety.

MO-DESE is developing a robust online content delivery system that will include professional development that addresses positive social and behavioral practices to support LEAs in improving school conditions. LEAs will be made aware of this content through the SSOS. When mature, this system will tie the MO-DESE's data collection systems such as Core Data, consultant logs, teacher\leader evaluation, system reviews and tiered monitoring with access for all district staff to online curricula materials,

career\technical education supports, common formative assessments, educator evaluation tools, self-assessment tools, professional development focusing on leadership, effective teaching and learning practices including social\behavioral practices, etc. The Virtual Learning Platform is an online portal that will provide MO-DESE endorsed, evidenced-based training. The materials in the virtual platform are organized to provide maximum flexibility of access of all users, from totally self-directed to highly directed and structured. MO-DESE also provides professional development for LEAs in the Multi-tiered System of Support that includes Positive Behavior Interventions and Supports.

3. School Transitions (ESEA section 1111(g)(1)(D)): Describe how the State will support LEAs receiving assistance under Title I, Part A in meeting the needs of students at all levels of schooling (particularly students in the middle grades and high school), including how the State will work with such LEAs to provide effective transitions of students to middle grades and high school to decrease the risk of students dropping out.

MO-DESE's online content delivery system will include material from the Missouri Comprehensive School Counseling Program Curriculum that will support LEAs in providing students with effective transitions to middle and high school grades. The Missouri Postsecondary Success Project (MPSS) is a college-and-career competency framework educators may use to systematically embed these competencies into course content. These competencies are integral to both in-school and postsecondary success by supporting students to be career-equipped, lifelong learners who are socially and emotionally engaged. This training is available to any LEA free of charge in both face-to-face and electronic formats.

Title I, Part C: Education of Migratory Children

Missouri's migratory children face challenges not often seen by others. MO-DESE provides grants to meet the needs of migratory students. Further, a team of regionally based Migrant Education Program (MEP) recruiters serve to support LEAs through student identification and recruitment as well as parent engagement. MO-DESE provides technical assistance to LEAs to connect with supports and services outside MO-DESE's area of responsibility.

5. Supporting Needs of Migratory Children (ESEA section 1304(b)(1)): Describe how, planning, implementing, and evaluating programs and projects assisted under Title I, Part C, the State and its local operating agencies will ensure that the unique educational needs of migratory children, including preschool migratory children and migratory children who have dropped out of school, are identified and addressed through:
 - I. The full range of services that are available for migratory children from appropriate local, State, and Federal educational programs;
 - II. Joint planning among local, State, and Federal educational programs serving migratory children, including language instruction educational programs under Title III, Part A;
 - III. The integration of services available under Title I, Part C with services provided by those other programs; and
 - IV. Measurable program objectives and outcomes.

The MO MEP is state administered and locally directed through funded LEAs and regionally based personnel in accordance with the state Service Delivery Plan (SDP). Annually, LEAs with significant numbers of identified eligible migratory students can apply for funding through the department's Consolidated Application Process.

MO-DESE along with representatives from LEAs participate in the Comprehensive Needs Assessment (CNA) and SDP process every three years resulting in a statewide set of program objectives that address the unique needs of migratory students in Missouri. As part of the CNA/SDP cycle, MO-DESE and LEAs evaluate implementation and outcomes. SDP implementation and outcomes are evaluated. The CNA process addresses the needs of all eligible migrant students including preschool, school age and out-of-school youth (OSY). Missouri's CNA was developed by a needs assessment committee composed of MEP staff and stakeholders. The committee identified four goal areas: English Language Arts, Math, School Readiness and High School graduation. The cycle is currently in the development stage of the SDP after new goals were established as part of the CNA process in February 2023. The MEP Continuous Improvement Cycle (CIC) process is used to evaluate data submitted by participating LEAs. The MEP staff also conduct a needs assessment protocol for all migratory children throughout the school year.

The administration of the Title I, Part C program is included within the ESEA Consolidated Budget Application. The application requires evaluation and approval of budgets and plans for all federally-funded programs. Within the application, LEAs receiving migrant funds must describe how awarded grant funding supports the state's measurable program outcomes (MPOs).

In addition to the statewide SDP document and application process, the unique needs of migratory students are determined through local needs assessment protocols. LEAs that receive migrant funding document the methods used to identify the unique needs of migrant children. Methods used by LEAs to identify needs include, but not limited to, family interviews, language proficiency assessments, skills checklists, teacher referrals, surveys and questionnaires, input from parents, support staff referrals, attendance records, and the review of academic records. This process also includes assessments, such as the Dial 3, Diagnostic Online Reading Assessment (DORA) and the Dynamic Indicators of Basic Early Literacy Skills (DIBELS). Additionally, recruiters use an OSY profile to ascertain immediate needs and goals of students who have dropped out of school or are not in school. For all preschool, school-aged, and OSY enrolled in an LEA that does not receive migrant funding, statewide personnel assess student and family needs in an ongoing basis and provide referrals and support services as needed. Needs are assessed formally, through the use of family needs assessment forms, and informally through periodic check-ins with families to maintain communication and address any issues.

Eligible children who reside within the boundaries of an LEA receiving migrant funds receive direct services through MO-DESE's MEP. In addition, LEAs with migrant students regardless of federal funding can receive support through the MEP recruiters. The MEP employs these recruiters to work with LEAs to develop and conduct needs assessments along with teacher training on best practices for having migrant students in the classroom. The MEP also conducts a needs assessment protocol for all migrant children throughout the school year.

i. Migratory students are eligible for all services provided by LEAs from appropriate local, state and federal education programs. LEAs that receive funding under Title I, Part C as a part of the ESEA Consolidated Application process are monitored every three years as a part of the Tiered Monitoring system.

As part of that monitoring process, LEAs are required to document the inclusion of migratory students' educational programs that best fit their needs. The MEP first ensures that students have equitable access to existing programs and services as they apply that include Title I, Part A, Title III, Special Education, McKinney-Vento, and Gifted and Talented. MEP staff make referrals to existing providers and programs, both school and community based. The MEP then directly provides a variety of academic and support services to address remaining needs due to the migratory existence including, but not limited to:

- Referrals to existing high-quality programs for preschool students, Parents as Teachers (PAT), and Head Start. Direct services provide young students with age appropriate materials and a family literacy approach to address school readiness. The focus is on language, literacy, math, and social-emotional skills development. Local and regional staff hold parent involvement activities where parents can learn more about developmental benchmarks; kindergarten readiness and expectations; and, at home activities to development emergent literacy and math skills.
- School Age students are provided with supplemental instruction in key content areas. MEP staff or LEAs provide homework help, credit recovery assistance, support with transition from elementary to middle or middle to high school, college and career readiness and summer learning opportunities.
- The MEP offers a variety of support services to OSY such as English language proficiency development; assistance with re-enrollment into a high school/high school equivalency program; and health and well-being lessons and referrals. The MEP provides information on workplace safety and health and nutrition. LEAs serving OSY are encouraged to counsel students on the importance of completing high school.

Evaluation of the local programs is done through a monitoring protocol established by MO-DESE. LEAs that receive funding under Title I, Part C are monitored by a representative of the state agency as part of the Tiered Monitoring system at least every three years. During a three year cycle, each subgrantee will complete a desk audit in which they respond to questions and submit documents electronically and will also receive an onsite review by a member of MO-DESE staff. As part of the monitoring process, LEAs are required to document the inclusion of migratory students' educational programs that best fit their needs.

In addition to the established Tiered Monitoring process, a targeted number of students are identified each quarter for internal re-interviews as a quality control process to ensure adequate recruiter training and correct completion of national eligibility documents. Each quarter, a random sample of students are identified and re-interviewed in order to ensure accurate information was documented on the original Certificate of Eligibility (COE). Changes may be noted, if necessary, and discrepancies are brought to the attention of MO-DESE where a final determination on eligibility is made.

ii. Joint planning and integration of services among local, State, and Federal education agencies is imperative in order to optimize services for migratory students. The MEP state director works closely with the Student Services director who oversees the Title III, Part A program to coordinate between the two programs. The state migrant director also collaborates with MO-DESE Office of Quality Schools, which administers other federally funded educational programs including Title I Part A and the McKinney-Vento Act for Homeless Children and Youth.

Joint planning occurs regionally throughout the state through bi-annual Regional Coordination Meetings with MO-DESE staff, MELL staff, funded district administrators and service providers, and recruiters. Regional MELL offices also provide a number of activities and trainings for funded districts. Specific topics are selected based on state data and input from LEAs. Improving needs assessments and services to migratory students not in school buildings (ages 0-2, preschool 3-5, and OSY) are identified topics to be addressed.

In the past, integration of services happened not only within each LEA and its federal programs, but also with community agencies. Local MEPs attend meetings and regularly work with organizations such as Catholic Migrant Farmworkers' Network, MO Department of Social Services and MO HealthNet to foster professional relationships and communication, enhance referrals to those agencies and improve access to services for migratory families. Local migrant staff liaise with Adult Basic Education programs, High School Equivalency Programs, and the CAMPs (Drury University and Crowder College) to engage at risk high school students, re-engage students who have dropped out, and promote high school graduation overall. The MO-MEP conducts joint program with various universities around the state to provide Migrant STEM Camps for high school age students in the summer and works with school districts in the Southeast portion of the state to provide summer learning opportunities for pre-K through Grade 8 students. The COVID-19 pandemic in 2020 suspended the summer programming opportunities. However, the MEP is working to develop new summer programming.

iv. MO-DESE conducts the state MEP evaluation with the assistance of an external evaluator knowledgeable about migrant education, evaluation design, federal reporting requirements and Office of Migrant Education (OME) guidelines, and the Missouri MEP. The evaluation collects information regarding the positives and negatives of the MEP and helps the State make decisions about program improvement and success.

The evaluation reports both implementation and outcome data to determine the extent to which the Measureable Program Objectives (MPO) for the MEP in communication arts, math, school readiness, and secondary/OSY achievement and high school graduation have been addressed and met.

Questions answered by implementation data include the examples below:

- Were local projects implemented as described in their approved MEP applications? If yes, what worked and why? If not, what didn't work and why not?
- What challenges were encountered by the MEP? What was done to overcome these challenges?
- What adjustments can be made to the MEP to improve instruction, professional development, and the involvement of migrant parents?
- To what extent were the procedures used for identification and recruitment of eligible migrant students found to yield reliable results?
- To what extent were MEP staff better prepared to help migrant students close the achievement gap?
- To what extent did migrant parents report being involved with their children's learning in literacy, mathematics, school readiness, and high school graduation?

Questions answered by outcome data include the examples below.

- To what extent did migrant students demonstrate proficiency on the MAP in Communication Arts and Mathematics?
- To what extent did 3-4 year old pre-K migrant children receive referrals to appropriate early childhood education programs designed to increase readiness for school?
- To what extent did secondary migrant students earn sufficient credits to remain on track for graduation?

Data on migrant students and services will be collected by the State from each of its sub-grantees. Data sources include: migrant parents, recruiters, migrant program administrators and instructional service providers, and other staff as appropriate.

Data will be collected through surveys, focus groups, structured interviews, and records reviews (including assessment results reported in the State's data collection and reporting system). Data analysis will include descriptive statistics based on Missouri migrant student demographics, program implementation, and student and program outcomes. Means and frequencies will be calculated. Tests of educational significance will be completed, and trend analyses done.

Missouri will prepare an annual implementation and outcome evaluation. Through the evaluation, data will be collected and reviewed by the State to systematically and methodically improve the program. Further, a written report on the progress made by the Missouri MEP toward meeting its MPOs will be prepared annually. This report will include recommendations for improving MEP services to help ensure that the unique educational needs of migrant students who are served in Missouri are being met.

MEP implements joint planning among local, state, and federal education programs through its Tiered Monitoring ~~process~~ of local programs. Each local program must implement strategies ~~around~~ in collaboration with service providers (social service agencies, health providers, College Assistance Migrant Program (CAMP), etc.) When monitoring local programs, MEP uses indicators aligned with program requirements and MPOs to examine the extent of fidelity in program implementation and integration of services and supports for all students, including migratory children and youth. The detailed monitoring tools include the requirements of Title I.C as well as Title I, II, and III to ensure implementation.

Student Assessment and Progress Monitoring Plan

For program improvement purposes and in accordance with the evaluation requirements provided in 34 CRF 200.83(a)(4), the evaluation data and demographic information described in sections 3 and 4 of this Service Delivery Plan will be collected, compiled, analyzed, and summarized by the Missouri MEP. These activities will help the State determine the degree to which the MEP is on target to reach the stated performance targets and effective based on the chosen measurable program outcomes. This will be done through the district migrant reporting process as well as through an annual program evaluation.

Specifically, data will be collected to assess student outcomes, monitor student progress, and evaluate the effectiveness of the MEP. The data to be collected for these purposes are listed in the tables on the following pages. Following each data element is information on the individual/agency responsible, method of data collection, and frequency of data collection.

Measurable Program Objectives and Outcomes

The following are the Measurable program objectives and outcomes stated in MO's SDP.

English Language Arts

- A. The gap in proficiency in English language arts on the state standardized test between migrant students participating in supplemental supports during the regular school year and non-migrant students will decrease by three percent annually.
- B. Annually, 80 percent of teachers of migrant students participating in migrant-sponsored professional development will report on a survey that they applied the English language arts strategies provided by the state MEP into their instruction.
- C. Annually, 80 percent of migrant parents participating in parent involvement activities (such as Parent Advisory Council meetings) will report on a parent survey that the activity helped them support their children's reading achievement.

Mathematics Achievement

- A. The gap in proficiency in mathematics on the state standardized test between migrant students participating in supplemental supports during the regular school year and non-migrant students will decrease by three percent annually.
- B. Annually, 80 percent of students receiving language-of-mathematics instruction will demonstrate a nine percent gain on LEA-approved semester assessment.
- C. Annually, 80 percent of migrant students will demonstrate a nine percent gain on a LEA-approved pre/post assessment of mathematics skill development.
- D. Annually, 80 percent of teachers of migrant students participating in migrant-sponsored professional development will report on a survey that they applied the mathematics strategies from the training to their instruction.
- E. Annually, 80 percent of migrant parents participating in parent involvement activities (such as Parent Advisory Council meetings) will report on a parent survey that the activity helped them support their children's mathematics achievement.

School Readiness

- A. Annually, 80 percent of migrant parents participating in family literacy activities will report on a parent survey that the strategies helped them prepare their children for school.
- B. Annually, 80 percent of migrant children ages four or five and not in kindergarten will receive referrals to appropriate early childhood education services as indicated on the LEA migrant report.

High School Graduation

- A. The four-year and extended graduation rates for migrant students will increase by 0.5 percent annually.
- B. Annually, 80 percent of teachers of migrant students participating in migrant-sponsored professional development will report on a survey that they applied the college-and-career readiness strategies from the training to their instruction.
- C. Annually, 80 percent of migrant parents participating in parent involvement activities related to high school graduation will report on a parent survey that the activity helped them support their children in making progress toward high school graduation.

- D. Annually, 80 percent of staff involved in providing support services for Out of School Youth will report on a staff survey that the services met the needs of migrant students.

The SDP evaluation will report both implementation and outcome data to determine the extent to which the measurable outcomes for the MEP have been addressed and met. Data will inform:

- Whether local projects have been carried out as described in their approved MEP applications
- Successes and challenges encountered by local projects, regional MELL offices, and State MEP staff
- Identification & recruitment procedures and results
- MEP staff professional learning
- Parent involvement activities
- Student proficiency in English Language Arts and Mathematics
- Secondary student credit accrual/graduation preparedness
- Preschool student access to early childhood education programs
- Educational and support services provided by the LEA to migrant students

The cyclical and reflective CNA/SDP/Evaluation process ensures that the needs of the migratory population within a state are continually monitored, prioritized and effectively addressed.

6. Promote Coordination of Services (*ESEA section 1304(b)(3)*): Describe how the State will use Title I, Part C funds received under this part to promote interstate and intrastate coordination of services for migratory children, including how the State will provide for educational continuity through the timely transfer of pertinent school records, including information on health, when children move from one school to another, whether or not such move occurs during the regular school year.

MO-DESE has determined that the Migrant Student Information Exchange (MSIX) provides a viable method to both share student information and serve student needs. The MEP is responsible for promoting inter-and intra-state coordination of services for migrant children, including the provision of educational continuity through a timely transfer of pertinent school records and relevant health information. Missouri participates in and contributes student information to the national MSIX to input, report and share accurate and timely migrant student information across the state and across the country. MO-DESE will also provide assistance to LEAs in acquiring and sending pertinent school records. As part of the MSIX system, MO-DESE has thoroughly reviewed the security protocols required for protection of personally identifiable student information. MO-DESE has received approval from the Missouri State Auditor's Office for participation in MSIX as a part of a comprehensive review of data security. MO-DESE is a member of OME-sponsored Consortium Incentive Grants and collaborates with other member states by sharing information about programs, policies and practices.

7. Use of Funds (*ESEA section 1304(b)(4)*): Describe the State's priorities for the use of Title I, Part C funds and how such priorities relate to the State's assessment of needs for services in the State.

In accordance with ESEA, Section 1304, programs for migratory children in Missouri must give priority of services to children who have made a qualifying move within the previous one-year period and who are failing, or are most at risk of failing, to meet the state's academic standards, or who have dropped out of school. Key factors that are considered by the Missouri MEP in determining "failing" or "at risk of failing" include, but are not limited to, the following:

- scored at Below Basic on the state assessment
- is an EL (students coded LEP)
- has an age or grade discrepancy
- was retained
- is at risk of failing to meet the state graduation requirements in one of the following areas
 - an unweighted GPA of 2.0 or below
 - has insufficient credits for promotion or graduation

Weighted allocation determinations take into account the number of migratory children that meet the above criteria.

The qualifying arrival date from the students Certificate of Eligibility is used to identify the students with a qualifying move within the previous one-year period.

The state's priorities are drawn from the CNA for migrant education. LEAs receiving funding are instructed to identify migrant students and prioritize them for receiving LEA-funded or referred services. Priority for Services (PFS) students enrolled in non-funded LEAs are identified by statewide migratory staff and are similarly prioritized for the provision of educational and support services from MEP personnel. Migrant students not identified as PFS status are also expected to receive educational and support services directly through the funded LEAs, or through statewide MEP personnel if they are enrolled in a nonfunded LEA. Specifically, the state has identified the need for services to support greater achievement in English and mathematics as measured by state assessments, greater persistence to graduation, and improved readiness for school. These priorities are the basis for the state's MPOs. Subgrantees are required to indicate how they will address the state's MPOs as part of the budget approval process. Data is collected as to how each subgrantee is budgeting funds toward the MPOs and reported annually as part of the state MEP. Statewide MEP personnel also document data regarding the provision of services to PFS and non-PFS migrant students, as provided throughout the school year and the summer term.

C. Title I, Part D: Prevention and Intervention Programs for Children and Youth who are Neglected, Delinquent, or At-Risk

MO-DESE provides grants to support students who have been placed by courts and agencies in facilities operated by the Missouri Department of Youth Services and the Missouri Department of Corrections. The programs support educational services while students are placed and support transition programs when students move out of those placements. Currently, 48 institutions serve 1,888 students. Of those institutions, 40 are purely correctional in nature. The remaining also address substance use or mental health needs of youth. Clearly, many of the youth served by these programs may be affected by multiple issues, including criminal behavior associated with substance use, mental health issues, or both.

1. Transitions Between Correctional Facilities and Local Programs (ESEA section 1414(a)(1)(B)): Provide a plan for assisting in the transition of children and youth between correctional facilities and locally operated programs.

MO-DESE provides technical assistance to the Department of Corrections, the Division of Youth Services (part of the Department of Social Services), other Title I. D. recipients and LEAs concerning transitional services that will enable neglected or delinquent youth to successfully enter an institution (including the provision of records, etc.), reenter school successfully and/or to find employment after they leave the institution and return to the local community. Detailed transition plans will be included and required for LEAs and agencies to complete in their application for funding.

MO-DESE will provide in-service training on programs and activities that other state agencies and LEAs may use to promote transitional services. These programs and activities are designed to assist the LEA and other agencies in developing a working relationship to accomplish a high-quality transitional program for the neglected or delinquent population.

In order to be granted funding under Title I, Part D., applicants must provide for timely transfer of records upon change of placement; assessment of student need; and an appropriate program that provides for academic education, career and technical education, and transitions to employment or further education.

While specifics will vary across subgrantees, each application must provide for the following:

1. timely transfer of student records between correctional facilities and locally operated programs;
2. timely implementation of the Individual Career and Academic Plan (ICAP), or, if necessary, adaptation and implementation of the ICAP;
3. if applicable, implementation of the Individual Education Plan (IEP);
4. availability of academic and career and technical education;
5. provision for state approved assessment;
6. provision for postsecondary education;
7. availability of transitional services and supports for students changing placement (to/from correctional facilities from/to locally operated programs); and
8. transitional services and supports to employment or further education.

MO-DESE will monitor that subgrantees transfer records, adapt and implement ICAPs, and IEPs in a timely manner. Further, MO-DESE will ensure that subgrantees provide for academic, career and technical, and postsecondary education as applicable. Finally, MO-DESE monitoring will examine transitional services and supports to ensure that student transitions to/from correctional institutions and locally operated programs, as well as to further education or employment, are implemented.

Subgrantees may fulfill the requirements for transitional supports and further education through the following, non-exhaustive list of methods;

- replacement programs that allow adjudicated or incarcerated youth to audit or attend courses on college, university, or community college campuses or through programs provided in institutional settings;
- work-site schools in which institutions of higher education and private or public employers partner to create programs to help students make a successful transition to postsecondary education and employment; and essential support services to ensure the success of the youth such as
 1. re-entry orientation programs, including transition centers in high schools;
 2. pupil services, including counseling, psychological, and social work services designed to meet the needs of neglected or delinquent children and youth;
 3. tutoring and mentoring programs;
 4. instruction and training at alternative schools and learning centers;
 5. services of in-school advocates on behalf of individual neglected or delinquent youth;
 6. information concerning and assistance in obtaining available student financial aid; and
 7. job placement services.

Needed services will be provided for such children and youth so they can make a successful transition from institutionalization to further schooling or employment. The LEA, with technical support from the SEA, will provide students who are at-risk with accurate information about the costs and consequences of dropping out of school. Schools districts and charter LEAs will work with students, families and available community resources to assist students who drop out and children and youth returning from correctional facilities or institutions for neglected or delinquent children and youth to complete their high school education and, when possible, to obtain postsecondary education.

2. Program Objectives and Outcomes (*ESEA section 1414(a)(2)(A)*): Describe the program objectives and outcomes established by the State that will be used to assess the effectiveness of the Title I, Part D program in improving the academic, career, and technical skills of children in the program.

Educational services will be provided for neglected, delinquent, and at-risk children and youth in local and state institutions so that such children and youth have the opportunity to meet the same challenging state academic content standards that all children in the state are expected to meet.

MO-DESE has established the following objectives for the Title I, Part D. program to ensure that the program results in improving the academic, career and technical skills of students being served:

- Goal 1: Provide for efficient and effective transitions for students

- Objective 1: Student records will be transferred between institutions within 10 days of change of placement.
- Objective 2: Appropriate ICAP (or replacement ICAP) will be developed and implemented within 15 days of change of placement.
- Goal 2: Improve student performance
 - Objective 1: Students will improve on English language arts and mathematics achievement as measured by MAP scores.
 - Objective 2: Students will improve on measures of College and Career Readiness or Success-Readiness as measured by the Missouri School Improvement Program, including appropriate assessments and completion of advanced coursework or Industry Recognized Credential (IRC) as appropriate.
 - Objective 3: Students will improve in postsecondary follow-up as measured by MSIP.

MO-DESE will collect such data as is necessary to monitor progress toward the goals and objectives. Where data analysis indicates the need for improvement at the institutional level, MO-DESE will collaborate with the institution to develop a corrective action plan.

D. Title II, Part A: Supporting Effective Instruction

The Office of Educator Quality (OEQ), a subsection of MO-DESE, provides rapid response to clients seeking certification and has gone beyond the simple act of ensuring that teachers are properly licensed. OEQ has been in pursuit of four primary efforts to improve the quality of educators and educational leaders. First, standards for teacher and leader evaluation have been adopted and are the basis for the model evaluation systems for these two classes of educators. The system addresses appropriate evaluation methods at all points in the professional career. MO-DESE collects data annually on the local evaluations system used by the LEA and levels of teacher performance. Second, MO-DESE has developed its own Educator Equity Plan to address the statewide needs of teacher supply. This state level equity plan is updated each year. Third, educator preparation institutions receive an Annual Performance Report- Educator Preparation Programs (APR-EPP) that provides information to the public on the quality of each preparation program in each Missouri institution. MO-DESE, while not responsible for higher education, does have authority to license the graduates of educator preparation programs. Finally, the Missouri Leadership Development System (MLDS) is in full implementation and serves principals from over 80 percent of the school districts in the state and over 40 percent of charter schools. . Training is provided to principals and assistant principals across the professional continuum on a statewide basis. All Missouri students deserve access to a sufficient quantity of high-quality educators to meet their educational needs.

1. Use of Funds (ESEA section 2101(d)(2)(A) and (D)): Describe how the State educational agency will use Title II, Part A funds received under Title II, Part A for State-level activities described in section 2101(c), including how the activities are expected to improve student achievement.

The strategies below are offered to ensure that all students have access to excellent teachers and leaders. Training and support were provided on developing local equity

plans that address strategies for ensuring that low-income and minority students have greater access to effective teachers and leaders. Strategies are also offered for building leadership capacity in the state and providing support for the use of the Beginning Teacher Assistance Programs (BTAP) and Professional Learning Guidelines. Support and training will also be provided to LEAs on the use of effective evaluation systems.

Strategy	Timeline	Funding Sources
Equity Labs provided assistance to LEAs in drafting local equity plans to address inequities of educational opportunities. An equity data chart with state level data is updated and posted publicly each year.	2016-2017	Title II A
The primary purpose of the MLDS is the development and support of effective school leaders. An array of professional learning experiences has been developed to support principal growth across a continuum of leadership competencies. Individual competencies are not addressed separately or in sequence, but are embedded in distinct Learning Experiences across five identified leadership domains: Visionary, Instructional, Managerial, Relational and Innovative. The MLDS serves as a blueprint for developing and supporting transformational school principals through a comprehensive system of learning modules that are engaging and relevant. Productive learning environments require skillful leadership. Through the collaboration of multiple stakeholders and applied understandings, the aim of putting a capable leader in every building across Missouri is possible. MLDS training and support are provided to all principals through leadership specialists located in regions across the state. Currently, the MLDS serves 1,600 principals and assistant principals from over 80 percent of school districts and over 40 percent of charter schools. The U.S. Department of Education conducted a monitoring of the Title IIA program during FY2022. As a result of the monitoring, MO-DESE received a commendation on the use of Title IIA funds to support leadership development through the MLDS in such a large percentage of Missouri schools.	2016-2023	Title II A
The State Board of Education establishes standards for successful mentoring programs. State Board of Education Rule 5 CSR 20-400.380 outlines the critical components of a mentoring program which include introduction to the cultural environment of the community/district/school/classroom, program evaluation, individualized educator plan, collaborative mentor selection, mentor training and support, roles and responsibilities of new teachers, administrators and mentors, and sufficient time for observations. These standards were	2016-2023	Title II A

Strategy	Timeline	Funding Sources
developed through a collaborative effort with representation from teacher organizations, administrator organizations, school districts, career and technical education educators, school counselors, and regional service centers. In addition, Rule 5 CSR 20-400.385 establishes the minimum requirements for topics to be addressed in a new teacher's Beginning Teacher Assistance Program (BTAP). Training modules and materials have been created to assist with developing and implementing programs that align to the mentor standards and BTAP guidelines. New teachers in LEAs receive this training to ensure first and second year teachers are effectively supported during critical early years. This past school year, nearly 1,000 new teachers received this training. The resulting teacher retention rates among participating teachers ranked higher than the average state teacher retention rate. The training highlights particular areas of need specific to being a first or second year teacher including topics such as effective instructional practices, classroom management, student engagement and motivation, professional communication, and education related law.		
Professional Learning Guidelines were developed to provide clarity and guidance on the key components and characteristics of high quality support and training to improve the instructional practice of educators. Training modules and materials were created to assist educators in using these guidelines to assess and improve the quality of the support and training that is provided to educators. LEAs received this training to enhance the quality and impact of the professional learning they provide in their school community. Trainings include topics such as an overview of the guidelines, the role of the professional development committee, how to use educator evaluation data and goals in the Continuous School Improvement Plan (CSIP) to inform the type of professional development that will be provided to teachers and school leaders. The guidelines are being revised to align with the recently released national professional learning standards. In addition, 1% of state funding for school districts is designated for use for the professional learning of teachers.	2016-2019	Title II A
Training and support is provided to school districts and charter schools to ensure, as required by State Board Rule 5 CSR 20-400.375, that their local evaluation system is aligned to the Seven Essential Principles of Effective Evaluation. Data are collected on an annual basis to ensure the local evaluation process in all school districts and charter schools aligns to these principles.		Title II A

2. Use of Funds to Improve Equitable Access to Teachers in Title I, Part A Schools (ESEA section 2101(d)(2)(E)): If an SEA plans to use Title II, Part A funds to improve equitable access to effective teachers, consistent with ESEA section 1111(g)(1)(B), describe how such funds will be used for this purpose.

Title II funds were used to assist LEAs in developing a local equity plan through an equity lab. This interactive lab served as an exciting and unique opportunity to ensure equitable access to excellent educators for every student regardless of race, socio-economic status, or geographic location. LEAs and other stakeholders engaged in crucial conversations focused on addressing educational inequities that exist across our state by exploring data, identifying causes, and developing strategies to build a framework for the development of LEA-level plans to support the implementation of the Missouri Equity Plan. An equity data chart is updated and posted each year using state level data. The expansion of the MLDS, allows MO-DESE to provide this support directly to school leaders on strategies to ensure equitable access to excellent educators for every student in their school.

MO-DESE has coordinated a significant commitment to the creation and expansion of Grow Your Own programs in the state. Using an initial investment of Title IIA funds, MO-DESE created an understanding of and commitment to the concept of Grow Your Own programs in Missouri. The Department then used relief funds to expand accessibility to Grow Your Own and has now established a state allocation to ensure that Grow Your Own is further developed and expanded each year. Growing your own teachers is a viable means of creating a continuous supply of quality, prospective candidates who are reflective of the diverse teacher workforce needs within a local school community. A recent survey of educators by the National Education Association indicated that 60 percent of teachers were teaching within 20 miles of the school they graduated from. The Office of Educator Quality has identified key components of a framework that can be utilized as a resource for LEAs to launch a Grow Your Own program. These include building awareness of the teaching profession, more in-depth exposure to teaching practice, hands-on experiences in teaching, and ensuring high-quality education. Based on the initial use of relief funds and now an allocation of state funds, Missouri has expanded the number of Grow Your Own programs from just over 100 school districts and charter schools to over 450 school districts and charter schools. Recruiting and supporting current students to prepare and return in the future as teachers, helps to ensure an excellent education for all students.

3. System of Certification and Licensing (ESEA section 2101(d)(2)(B)): Describe the State's system of certification and licensing of teachers, principals, or other school leaders.

MO-DESE's system of certification and licensing of teachers, principals and other school leaders to practice is based on revised content assessments and performance assessments aligned to the state's teacher and leader standards. Missouri has several methods for an individual to enter the education profession with a "certificate of license to teach." The following routes are available:

- Traditional route: An individual completes a four-year, college-recommended course of study, does student teaching, passes the designated assessment test, and graduates with a bachelor's degree in a field of education and is issued an initial certificate.
- Alternative or Innovative route: An individual with a bachelor's degree in a content area (such as English or Mathematics) returns to a college of education for a program of study that may enable him to take courses and teach simultaneously. The teacher works under a two-year, provisional certificate and usually completes about 30 semester hours of education courses. When the college program is completed and the designated assessment test passed, the college recommends and the individual receives an initial certificate. Some of these programs are offered via distance learning, some programs offer a master's degree plus certification and some offer only the certification.
- Temporary Authorization route: An individual with a bachelor's degree in a content area (such as English or Mathematics) takes self-directed courses – a maximum of 24 college credits (varies for different areas) to meet specified competencies, teaches for two years, is mentored by the school district and passes at least two exit examinations. The individual works under a one-year, renewable certificate that requires nine semester hours of college credit each year in order to be renewed. When requirements are completed, the individual receives an initial certificate.
- ABCTE: An individual who holds a bachelor's degree and meets the ABCTE requirements is eligible for a regular Missouri teaching certificate. The individual will be issued an Initial Professional Certificate by MO-DESE. ABCTE certificate holders are subject to the same mentoring and professional development requirements that apply to all new teachers in Missouri.

State statute, State Board of Education rules, guidelines and standards have been developed for teacher induction, which includes mentoring and beginning teacher assistance programs. Professional Learning Guidelines have been developed and are used by LEAs to ensure the ongoing growth and improvement of practice. By law, one percent of a school district's state funding must be used for the professional development of its educators. The expenditure of these local funds is directed by a professional development committee. State-sponsored professional learning includes a Teacher Academy that provides teachers the opportunity to improve their instructional practice within a statewide network of teachers.

Administrative certificates require a candidate to pass new content and performance assessments. State Board of Education rule requires two years of mentoring for principals and directors, and one year for school superintendents.

A group of key stakeholders are members of the Missouri Leadership Development System (MLDS) Commission. Members of the MLDS Commission include representatives of the three professional organizations for administrators, a higher education

association, regional service providers, MO-DESE, as well as two practicing principals. The MLDS commission provides oversight and guidance of the MLDS which is a comprehensive system for supporting school leaders beginning with pre-certificate and extending throughout their career.

4. Improving Skills of Educators (ESEA section 2101(d)(2)(J)): Describe how the SEA will improve the skills of teachers, principals, or other school leaders in order to enable them to identify students with specific learning needs, particularly children with disabilities, English learners, students who are gifted and talented, and students with low literacy levels, and provide instruction based on the needs of such students.

MO-DESE will improve the skills of teachers, principals and other school leaders in identifying students with special learning needs by conducting statewide training on the initial evaluation process for determining student eligibility for services. This training will

- outline the steps teachers, principals, and other school leaders should take prior to proposing an evaluation to ensure the student is not at risk due to inadequate instruction or interventions. Staff must clearly describe the evidence-based classroom and intervention practices provided prior to proposing a student evaluation.
- assist staff in recognizing and understanding any biases which could lead to unnecessary evaluations and/or placements.
- assist LEAs in reviewing their intervention processes and strategies to ensure students are not being identified for special education simply because other supports for struggling students are not available.

Additionally, MO-DESE will create a virtual platform to provide training and resources to increase the use of evidence-based interventions. MO-DESE will focus on the high-effect size interventions and strategies outlined in John Hattie's⁵ meta-analysis. The virtual platform will provide training and resources that will be accessible to all LEAs and teachers. This training will improve the skills of teachers, principals and other school leaders in identifying students with other learning needs such as English learners, students who are gifted and talented, and students with low literacy levels. Additionally, the platform will provide guidance on the provision of timely and meaningful feedback for staff and students. The platform will be designed to

- increase the universal (classroom level) use of effective teaching and learning practices;
- increase the use of data to guide instructional practice;
- increase the appropriate usage using common formative assessments;
- build collaborative cultures that result in high levels of learning and increased student achievement;

⁵ Hattie, John A. C. (2009) Visible Learning; Routledge, New York.

- create positive behavior supports for the regular classroom and help staff connect these activities as part of the typical school day; and
- provide training and resources for all teachers to support students with challenging academic and behavioral needs, especially for students in need of targeted and intensive levels of support.

These effective practices and strategies will provide rich resources for meeting the goals of students with disabilities.

5. Data and Consultation (*ESEA section 2101(d)(2)(K)*): Describe how the State will use data and ongoing consultation as described in ESEA section 2102(d)(3) to continually update and improve the activities supported under Title II, Part A.

MO-DESE will collect and utilize data to continually update and improve activities that are being supported by Title II, Part A funds in the following ways:

- The Missouri Leadership Development System (MLDS) uses an external evaluation to guide the improvement of the system by evaluating the delivery of training, the knowledge gained, the application of new learning and its impact as a result of the training and support provided to principals. In meaningful consultation through focus groups and committee work with central office school leaders, principals, charter school leaders and the state's leadership specialists, this data will be used to improve the quality of training and to determine impact on teachers and learning. Consultation will also occur with teachers and associations and other professional communities through presentations or webinars to provide information about the training and support being provided to school leaders as well as to gather feedback about the perceived needs of school leaders.
- LEAs will receive training and support on effective practices in the educator evaluation process. This includes the use of student growth measures as a part of the local evaluation of educators. Data will be gathered to evaluate the quality of training provided, the extent of knowledge gained, the degree in which new learning was applied, and the overall impact of this new learning. The data gathered through surveys will be used in meaningful consultation with K-12 stakeholders including central office school leaders, principals, charter school leaders, teachers and professional associations regarding the effectiveness of the evaluation system for improving the quality of teaching and learning.
- Teams from LEAs will receive training and support on the guidelines for Beginning Teacher Assistance Program (BTAP) and the state's Mentor Standards. Data will be gathered to evaluate the impact of these guidelines and standards on the quality of induction provided by LEAs and its impact on teacher retention. Data collected at the end of trainings and in follow-up, focused discussions will be used to consult with LEA school leaders and teachers to refine the language of the standards and guidelines and to assess and improve the quality of induction provided to new teachers and principals.
- Missouri's Equity Plan and equity chart includes various measures that serve as indicators of equitable education for students in various types of school communities. The data are used to determine equity between two different types of school communities. Once gaps are identified,

strategies are developed and implemented to eliminate the gaps. Consultation with professional associations, parents and other community stakeholders through surveys, focus groups, or committees will also take place regarding changes in learning opportunities for all students based on strategies implemented from Missouri's Equity Plan and the data from the equity chart.

- High quality preparation is essential for ensuring first year teachers are ready and able to begin making a positive impact on student learning. Missouri is implementing a process of continuous improvement for all preparation programs in the state. Data will be gathered through the Annual Performance Report for Educator Preparation Programs (APR-EPP) to determine the impact on the quality of first year teachers. Meaningful consultation will occur with educator preparation program stakeholders and their associations through committees and webinars on how the data can promote improvement through. Consultation will also occur with K-12 stakeholders including LEA school leaders and teachers on the readiness of first year teachers using annual surveys conducted through the Core Data Collection System. Additionally, the data will be used to communicate through the Department website on the quality of programs to parents and their children as they make determinations about higher education selections.

6. Teacher Preparation (ESEA section 2101(d)(2)(M)): Describe the actions the State may take to improve preparation programs and strengthen support for teachers, principals, or other school leaders based on the needs of the State, as identified by the SEA.

MO-DESE is doing extensive work along the entire education workforce continuum. Significant reform efforts have occurred in the preparation of all teachers and school leaders, including those that will serve low-income students, students with disabilities and English learners. This work includes the development of the Annual Performance Report for Educator Preparation Programs (APR-EPP) for all four-year preparation programs. The APR-EPP is used to guide the continuous improvement of Educator Preparation Programs. A state team comprised of key association members, stakeholders, MO-DESE, the Missouri Department of Higher Education and practitioners participate as part of the MO-DESE Missouri Transforming Educator Preparation (MOTEP) initiative. This group assists in the development and revision of the APR-EPP for all educator preparation programs.

The APR-EPP generates a rating based on several types of data. This data includes whether the educator is knowledgeable of the content, can perform effectively in the classroom, and perceptual data. The APR-EPP is used for the ongoing approval of all certification programs determined on an annual basis. MO-DESE will compile the performance data to determine whether or not an individual certification program continues to meet the state performance standards: Academics, Field and Clinical Experiences and Candidates. MO-DESE uses the following categories to accredit certification programs:

1. Accredited: Certification programs that meet all of the standards for the preparation of educators will be accredited and may continue to recommend candidates for certification.
2. Provisional Accreditation: Certification programs rated as Tier 3 will be issued a status of Provisional Accreditation based on points earned on at least two of the four indicators. If a particular certification program does not meet cell size requirements for generating an accountability determination, the corresponding certification cluster may instead be subject to this classification if the combined performance of the certification areas is rated Tier 3. If possible, a particular certification program within a cluster may be identified for improvement. The Provisional Accreditation classification does not require action by the Board, and the EPP retains the ability to continue to recommend candidates in those areas of certification.
3. Conditional Accreditation: Certification programs already classified as provisionally accredited that have remained in Tier 3 or certification programs that are classified as Tier 4 on at least two of the four APR indicators become conditionally accredited. It is possible for a particular certification program within a cluster to be identified for improvement.

Title II funds will also be used to support enhanced communication with all educator preparation programs in the state on improving the quality of teacher candidate preparation. For example, communication will focus on the implementation of the new Teacher Preparation Regulations in all preparation programs. Common language used across all preparation programs and standardization of communications contributes to the overall effectiveness of the preparation process of teacher candidates.

E. Title III, Part A, Subpart 1: English Language Acquisition and Language Enhancement

Missouri's school age English learners (EL) are served through LEAs along with MELL instructional specialists. The MELL staff are regionally based professionals who support students by providing technical assistance and professional development to local school staff. MO-DESE provides funds from Title III, Part A to LEAs to further support English learners. Students, for whom English is not their primary language, concentrate in selected urban and suburban schools but are dispersed across the state. The largely dispersed nature of the English learner subgroup adds is a significant challenge to providing language specific support.

1. Entrance and Exit Procedures (ESEA section 3113(b)(2)): Describe how the SEA will establish and implement, with timely and meaningful consultation with LEAs representing the geographic diversity of the State, standardized, statewide entrance and exit procedures, including an assurance that all students who may be English learners are assessed for such status within 30 days of enrollment in a school in the State.

As a part of federal requirements, LEAs are required to identify incoming students who qualify as ELs. Since the 2010-11 academic year, Missouri LEAs have used the screening

assessment provided by WIDA. LEAs have 30 calendar days upon enrollment to administer the screening assessment.

The LEA administers a Language Use Survey (LUS) in a language the parents or guardians can understand. The LUS must include, at a minimum, the following three questions:

- What was the student's first language?
- Which language(s) does the student use (speak) at home and with others?
- Which language(s) does your child hear at home and understand?

If a language other than English is noted on the LUS or the LEA discovers crucial information was withheld, the LEA must begin the LEA-approved EL Identification Protocol and, if appropriate, assess the student using the WIDA-ACCESS® 2.0 Placement Test (W-APT). The student must be assessed within 30 days from enrollment. Students who score below the state-defined minimum for English language proficiency on the language screening tool are eligible for services and must be placed into the LEA-approved language support program. Parents or guardians must be notified in writing of the student's eligibility for and placement in the LEA's language support program.

Depending on the grade-level of the student, and the semester enrolled, the student will take either the WIDA Kindergarten Screener or the WIDA Online Screener. Students who score below the state-defined minimum for proficiency on the screener must be placed into the LEA LIEP. MO-DESE has determined English proficiency is demonstrated with an overall score of 4.7 on WIDA ACCESS. Therefore, students qualify for the LEA LEIP with a score less than 4.7 on the screener.

Annually, LEAs must assess the English Language proficiency (ELP) of ELs in grades Kindergarten through 12. Students are tested on listening, speaking, reading and writing using the suite of WIDA ACCESS assessments.

MO-DESE, working with stakeholders through the state, use data comparisons between WIDA ACCESS scores and proficiency on state content English Language Arts assessments to determine a cut point for proficiency. The state determined that an overall score of 4.7 on the WIDA ACCESS ELP assessment demonstrates proficiency of the English Language. Student scoring 4.7 or above on the WIDA ACCESS assessment must be exited.

2. SEA Support for English Learner Progress (ESEA section 3113(b)(6)): Describe how the SEA will assist eligible entities in meeting:
 - i. The State-designed long-term goals established under ESEA section 1111(c)(4)(A)(ii), including measurements of interim progress towards meeting such goals, based on the State's English language proficiency assessments under ESEA section 1111(b)(2)(G); and
 - ii. The challenging State academic standards.

With the development of the Missouri Learning Standards, and the accompanying assessments, LEAs have available both the state's educational goals and a means to

measure student performance against them. ELs have a legal and educational right to schooling that assists them in meeting these standards.

To ensure that LEA programs respond to the unique educational needs of linguistically diverse students, LEAs must use curriculum tied to scientifically-based research on teaching ELs, and must have demonstrated effectiveness, which involves the application of rigorous, systematic, and objective procedures to obtain reliable and valid knowledge relevant to educational activities and programs. LEAs use the Missouri English Language Development (ELD) Standards as a basis for developing their own curricula, incorporating a scope and sequence that can be adapted to their individual program requirements and their EL population. With the Missouri ELD Standards as a guide and through collaboration of EL and content area teachers, ELs are provided quality instruction that enables them to meet school expectations, perform well on mandated assessments, and become college and career ready.

All teachers involved in the student's education must pay attention to supporting students as they acquire both content knowledge and English proficiency (EL Toolkit, 2015). As always, LEA personnel must consider the characteristics and needs of the students as well as have specific training necessary to provide evidence-based support for ELs. Some newcomers arrive with an extensive, quality education in their home country. In some cases, these students have taken years of English classes. Students who have received a formal education in their home country may need minimal accommodations or modifications to access subject area content and will catch up quickly, especially those with a high level of literacy in the native language. On the other end of the spectrum, other newcomer students may not have attended school for months or years. They may have little understanding of English and may not be literate in their home language. Some speak a dialect of the home language that is unfamiliar to school personnel. Due to the variety of characteristics, ELs will need varying levels of modifications, accommodations, and supports from all teachers to be successful.

In addition to sufficient training, all teachers should be familiar with the student's EL level as determined by the WIDA Screener or the yearly ACCESS assessment and are responsible for providing scaffolds and supports targeting the student's specific ELP level. These assessments allow teachers to make data-informed decisions to meet the students where they are and to take them to the next level.

LEAs use WIDA ACCESS scores to determine interim progress towards proficiency. MO-DESE has established a set of growth progress indicators to be used by LEAs to track student development.

MO-DESE's long-term goals and measurements of interim progress were established based on a report from the WIDA Consortium⁶. The following steps were used to determine the benchmarks established as prescribed under No Child Left Behind:

⁶ Research Brief, AMAO Guidance, November 2007, H. Gary Cook

- MO-DESE defined the English proficiency level (ACCESS Overall Composite Score of 5.0 or higher with no less than 4.5 in Reading or Writing. Subsequent research indicated that recalibration was necessary under WIDA ACCESS 2.0®. The AEP composite score required is now 4.7).
- MO-DESE determined the cohort of ELs for analysis (Cohort 1 – Students who have been in the district receiving ELL instruction three years or fewer, Cohort 2 – Students who have been in the district receiving ELL instruction four years or more).
- MO-DESE set the starting point for AMAO 2 targets (To meet the AMAO 2, 15 percent of students in Cohort 1 who have taken the state ELP assessment must score at least an overall 5, and 20 percent of students in Cohort 2 who have taken the state ELP assessment must have scores of at least an overall 5. AMAO targets for each cohort will increase by one percent annually).
- MO-DESE determined the rate of annual growth.

MO-DESE has elected to continue with the benchmarks established as part of the previous law.

Progress to English Language Proficiency							
English Learners	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	2021-22
Cohort 1	8.8%	9.8%	10.8%	11.8%	12.8%	13.8%	14.8%
Cohort 2	10.7%	11.7%	12.7%	13.7%	14.7%	15.7%	16.7%

All Title III-funded schools will receive annual reports on progress made toward meeting the long-term goals, and technical assistance is provided at the state level by the director of English Language Programs and the director of English Language Curriculum. Additional assistance is provided through a network of regional English language instructional specialists who work directly with LEAs that have been identified as having not met either the progress goals outlined in the accountability section of this plan or the proficiency intervals of the long-term goals. LEAs receive personalized technical assistance via MO-DESE representatives and instructional coaches. MO-DESE representatives proactively hold technical assistance workshops throughout the state as part of the ELD Curriculum, Instruction and Assessment program.

To ensure that LEAs are continuously improving their plans to address the unique needs of ELs and immigrant students, the SEA includes instructional coaches on the Regional School Improvement Teams (RSIT). In addition, various MO-DESE sponsored Train the Trainer opportunities are available during the year along with statewide regional and virtual ongoing professional development workshops addressing the needs of all ELs including low-incidence districts, ELs with disabilities, students with interrupted formal education (SIFE), and recently arrived ELs (RAELs) as part of the ELD Curriculum, Instruction and Assessment Program.

3. Monitoring and Technical Assistance (ESEA section 3113(b)(8)): Describe:

- i. How the SEA will monitor the progress of each eligible entity receiving a Title III, Part A subgrant in helping English learners achieve English proficiency; and
- ii. The steps the SEA will take to further assist eligible entities if the strategies funded under Title III, Part A are not effective, such as providing technical assistance and modifying such strategies.

Each LEA that receives funding is monitored through MO-DESE's Tiered Monitoring System. All LEAs are placed in one of three cohorts and submit documents on a rotating schedule.

The monitoring begins with the Student Support Services director, who provides oversight of Title III, Part A Subpart 1, reviewing the plans and budgets within the ESEA Consolidated Budget Application for each LEA. Each school year, one of the assigned cohorts will participate in a desk monitoring by submitting the ESEA Self-Monitoring Checklist (SMC) in October. Each SMC includes questions the LEA must answer about requirements in ESSA. LEAs are also required to upload supporting documentation. LEAs that are out of compliance receive a corrective action plan (CAP), LEAs address the CAP by uploading documentation, or write a plan of action to demonstrate how they will provide services to EL students who are English learners in order to achieve AEP.

Technical Assistance is provided at the state level by the director of Student Support Services and the director of English Language Curriculum. Additional assistance is provided through English language instructional specialists who work directly with LEAs that have been identified for services.

F. Title IV, Part A: Student Support and Academic Enrichment Grants

Local schools have significant latitude to determine the allowable uses of Title IV, Part A funds most closely aligned to local need. The state level perspective for these needs includes an understanding that many schools, especially smaller and outstate ones, lack adequate resources to provide access to advanced coursework. While this is often attributed to a lack of qualified teachers, a confounding factor is the fact that outstate schools often lack sufficient connectivity to supply coursework virtually. Missouri is fortunate to have a current statewide government effort to ensure that every school has a minimum bandwidth of 100 kbps per student.

Use of Funds (ESEA section 4103(c)(2)(A)): Describe how the SEA will use funds received under Title IV, Part A, Subpart 1 for State-level activities.

Since the original approval of the plan, legislation passed which created the Missouri Course Access Program (MOCAP). MOCAP offers courses for 5th through 12th grade and may expand to

serve grades K-12. Students can take courses from any Internet-connected computer, available 24-hours a day, and seven days a week. MOCAP's mission is to offer Missouri students equal access to a wide range of high quality courses, including advanced content that may not otherwise be available.

MO-DESE has identified two areas of critical need for state level activities under Title IV, Part A, Subpart 1. The areas of need include

- Safe and healthy schools (including social-emotional wellness, counseling and mental health, school safety) for all Missouri students.
- Success-Ready students, including the provision of workforce awareness and exploration for elementary students.

Missouri's identification of these areas of critical need are aligned with:

1. The Show-Me Success Plan;
2. Governor Parson's priority focus on workforce development; and
3. Recommendations from the Missouri School Safety Task Force.

Missouri will use the state set-aside to provide technical assistance to school districts and charter schools in addressing the following issues related to school safety:

- School emergency operation plans
- Physical security site assessments
- Emergency preparedness drills
- Cyber/Privacy security plans
- School violence reporting system (Courage 2 Report)
- School safety and violence prevention

In addition, Missouri will use the state set-aside to expand work related to social-emotional learning and trauma informed instruction, which may include a variety of activities based on available funding.

- Expand opportunities for professional learning related to the Missouri Model. The Missouri Model is a developmental framework for the trauma-informed schools initiative.
- Expand opportunities for professional learning related to social-emotional learning.
- Creation of a central hub for resources providing districts and charter schools with access to information about all available resources.

MO-DESE will also use its Title IV set aside for workforce awareness activities and exploration in grades not otherwise funded. This will allow MO-DESE to focus on career awareness in alignment with Governor Parson's focus on workforce development.

1. Awarding Subgrants (ESEA section 4103(c)(2)(B)): Describe how the SEA will ensure that awards made to LEAs under Title IV, Part A, Subpart 1 are in amounts that are consistent with ESEA section 4105(a)(2).

MO-DESE will ensure no allocation is below \$10,000 through its internal fiscal and performance management controls. Missouri received sufficient funding in 2017-2018

to award by formula with at least \$10,000 to all eligible LEAs. If future funding does not permit Missouri to meet the minimum of \$10,000 by formula, allocations shall be ratably reduced, per Sec. 4105(b).

Title IV, Part B: 21st Century Community Learning Centers

Many young people and families stand to benefit from extended opportunities for learning, both academic and otherwise, as well as opportunities for meaningful engagement with others. MO-DESE supports these students and families through grants to establish and expanded 21st Century Community Learning Centers. These competitive grants are awarded across the state. Awards will be restricted to applications that propose to primarily serve students who attend schools that are eligible to be Title I Schoolwide programs (40% or more of the student population is eligible to receive free and reduced price lunch. Competitive priority will be given to support communities in which a Comprehensive Support and Improvement School is located.

2. Use of Funds (ESEA section 4203(a)(2)): Describe how the SEA will use funds received under the 21st Century Community Learning Centers program, including funds reserved for State-level activities.

MO-DESE will

- i. reserve no less than 93 percent of the amount allotted to the state for making awards to eligible entities to implement a 21st CCLC program.
- ii. reserve no more than two percent of the amount made available to the state for the administrative costs of carrying out the SEA responsibilities of the program and convening of a rigorous peer-review process for competitive applications received for consideration of awards.
- iii. reserve no more than five percent of the amount made available to the State for activities such as monitoring, technical assistance, training, capacity building, comprehensive evaluations and other possible activities as listed under Section 4202(c).

Awarding Subgrants (ESEA section 4203(a)(4)): Describe the procedures and criteria the SEA will use for reviewing applications and awarding 21st Century Community Learning Centers funds to eligible entities on a competitive basis, which shall include procedures and criteria that take into consideration the likelihood that a proposed community learning center will help participating students meet the challenging State academic standards and any local academic standards.

The 21st Century Community Learning Center (CCLC) program will be made available as a competitive grant. Grant opportunity announcements will be shared through webpages and other social media, and various miscellaneous organizations/entities around the state. The SEA will review all applications submitted for completeness and eligibility. The SEA will use a rigorous peer review process consisting of qualified reviewers using a weighted rubric to evaluate and score each application based on the

quality of the proposed activities and the evidence provided to demonstrate the capability of the applicant to implement the proposed program. Reviewers will use an objective analysis in conducting a comparative assessment of the application in accordance with the evaluation criteria specified in the application guidance (i.e. need for program, program design including how the center will help participating students meet the challenging academic standards, cost of program, program evaluation, partnerships, etc.).

Competitive priority for awarding 21st Century Community Learning Centers grants is given to applicants proposing to primarily serve students who attend schools that are implementing comprehensive support and improvement activities or targeted support and improvement activities under section 1111(d); or other schools determined by the LEA to be in need of intervention and support; or schools that enroll students who may be at risk for academic failure, dropping out of school, involvement in criminal or delinquent activities, or who lack strong positive role models. Each award will be funded at an amount of not less than \$50,000 federal funds and will be of sufficient size, scope, and quality to give reasonable promise of meeting the purposes of the 21st CCLC program. All funds will be awarded on a competitive basis.

Measurable goals and objectives for the 21st Century Community Learning Center Program include the following:

Goal 1 – Youth Outcomes. Support or increase student interest, sense of competence and achievement in the areas of the program focus (e.g., academic, social & emotional, health & nutrition, career awareness, post-secondary access, personal and life skills, commitment to learning, etc.).

- 1.1 Program will score satisfactory or above on the Program Attendance rubric
- 1.2 Program will score satisfactory or above on the Academic Enrichment rubric
- 1.3 Program will score satisfactory or above on the Positive School Behaviors rubric
- 1.4 Program will score satisfactory or above on the Family Engagement rubric

Goal 2 – Program Content. Develop and maintain quality programming that includes a safe and supportive environment, positive interactions, and opportunities for authentic engagement in the areas of programming.

- 2.1 Program (site) will score satisfactory or above on the Observed Program Quality rubric
- 2.2 Program (site) will score satisfactory or above on the Academic Enrichment rubric
- 2.3 Program (site) will score satisfactory or above on the Broad Array rubric
- 2.4 Program (site) will score satisfactory or above on the Family Engagement rubric

Goal 3 – Program Personnel – Employ staffing practices that support a quality program.

Goal 4 – Program Management – Implement management practices that support a quality program.

Optional: applicants may also select one, but not more than two, additional content area(s) below to include in their program design based on their program’s specific area(s) of focus.

- x.5 Program (site) will score satisfactory or above on the Positive Youth Development rubric
- x.6 Program (site) will score satisfactory or above on the Youth-Adult Partnership rubric
- x.7 Program (site) will score satisfactory or above on the Health and Wellness rubric
- x.8 Program (site) will score satisfactory or above on the STEM rubric
- x.9 Program (site) will score satisfactory or above on the Civic Engagement rubric
- x.10 Program (site) will score satisfactory or above on the Career Awareness rubric
- x.11 Program (site) will score satisfactory or above on the Post-Secondary Access/High School rubric
- x.12 Program (site) will score satisfactory or above on the Entrepreneurship rubric
- x.13 Program (site) will score satisfactory or above on the Workforce Readiness rubric
- x.14 Program (site) will score satisfactory or above on the Family Support/Wrap Around Services/Basic Needs rubric
- x.15 Program (site) will score satisfactory or above on the Recreation rubric

G. Title V, Part B, Subpart 2: Rural and Low-Income School Program

The statistical landscape of Missouri schools is that eight percent of the 547 LEAs serve fifty percent of the public school students. While that statistic illustrates the level of student concentration in large districts, it also implies that the other ninety-two percent of districts tend to be rural, outstate, and small, often facing significant economic disadvantage. The Rural and Low-Income School Program will be used by MO-DESE to provide compensatory grant funds to offset the competitive and allocation disadvantages of these districts.

1. Outcomes and Objectives (ESEA section 5223(b)(1)): Provide information on program objectives and outcomes for activities under Title V, Part B, Subpart 2, including how the SEA will use funds to help all students meet the challenging State academic standards.

The purpose of Title V.B.2 is to provide for equity in cases where rural or low-income schools receive allocations insufficient for their needs and are at a competitive disadvantage for other grants. The allowable uses of Title V.B.2 include alignment with the purposes of

- Title I, Part A
- Title II, Part A
- Title III
- Title IV, Part A or Part B

Each of those title programs attempts to improve student achievement through either school improvement, support of English learners or access to a well-rounded education. Because Title V.B.2 is an equity mechanism with allowable uses aligned to other specific Titles under ESEA as modified by ESSA, the program goals for Title V.B.2 will be the same as the program goals associated with the chosen allowable use.

LEAs have needs assessments and associated plans with each of these title programs. Clearly, those LEAs that are disadvantaged due to poverty, size or rural setting require some additional support to meet their students' needs through those plans.

MO-DESE will ensure that LEAs use Title V.B.2 for purposes of improving academic achievement by requiring LEAs to indicate how Title V.B.2 funds will be aligned to the work outlined in the other Title(s). The goals for academic achievement for Title V.B.2 will consequently be those set as the state's long-term goals for academic achievement and graduation.

Each LEA will be required to submit an assurance to MO-DESE that the funds received under Title V, Part B will be expended for needs outlined in the LEA's needs assessment or as outlined in the state's Consolidated Plan.

The following list provides examples of how LEAs might use funds under Title V.B.2. This list is provided for illustrative purposes but is not intended to be comprehensive nor exhaustive.

Title I.A

- Professional development on evidence-based effective practices for Title I. A. teachers

Title II.A

- Training for principals on evidence-based school improvement practices

Title IV.A

- AP, IB, or on-line coursework fees to increase access to rigorous coursework

MO-DESE will make grant awards by formula proportionate to the numbers of students in average daily attendance served by eligible LEAs.

2. Technical Assistance (*ESEA section 5223(b)(3)*): Describe how the SEA will provide technical assistance to eligible LEAs to help such agencies implement the activities described in ESEA section 5222.

MO-DESE's Office of Quality Schools hosts an annual Federal Programs Conference for stakeholders to provide technical assistance on the federal law, regulations and requirements. The Federal Programs staff conducts webinars throughout the year for specific requirements from the law concerning special populations (homeless students, foster students and nonpublic students/requirements). When reasonable and necessary, the Federal Programs staff conducts regional meetings to assist LEAs on completing the budget, plan, tiered monitoring, and/or the self-monitoring

checklist. MO-DESE Federal Programs supervisors also provide technical assistance during on-site monitoring visits and during the approval of plans and budgets.

A. Education for Homeless Children and Youth program, McKinney-Vento Homeless Assistance Act, Title VII, Subtitle B

Homelessness is present in schools throughout Missouri. Children and youth experience the uncertainty of housing and other basic needs. Through technical assistance and direct consultation, MO-DESE supports local districts and charter LEAs to meet the needs of these students. To the extent that federal allocations allow, MO-DESE provides grants to schools in the greatest need.

Student Identification (722(g)(1)(B) of the McKinney-Vento Act): Describe the procedures the SEA will use to identify homeless children and youth in the State and to assess their needs.

MO-DESE collects data at the individual level through the Missouri Student Information System (MOSIS) and aggregates the counts for data reporting and collections at the state and federal level. The Student Core File includes a single record for each student which includes an indicator as to the student's homeless status. This information is collected as necessary in the October, December, February, April and June data submissions.

Each LEA assesses the needs of the students who have been identified as homeless. The LEA may contact the state homeless coordinator if they are in need of technical assistance in assessing the needs of the identified student.

1. **Dispute Resolution** (722(g)(1)(C) of the McKinney-Vento Act): Describe procedures for the prompt resolution of disputes regarding the educational placement of homeless children and youth.

Subtitle VII-B of the McKinney-Vento Homeless Assistance Act (42 U.S.C. Section 11431), reauthorized in 2015 by Title IX, Part A of the Every Student Succeeds Act, requires state educational agencies (SEAs) to include in their Consolidated State Plan a description of procedures that result in the prompt resolution of disputes regarding the educational placement of children and youth experiencing homelessness (42 U.S.C. Section 11432 (g)(1)(C)).

The dispute resolution process is intended to represent each party's views for objective consideration so that disagreements can be resolved expeditiously and in keeping with the McKinney-Vento provisions.

1. LEA Level The child or youth shall be immediately enrolled in the school in which enrollment is sought, pending final resolution of the dispute, including all available appeals (42 U.S.C. Section 11432(g)(3)(E)(i). In the case of an unaccompanied youth, the local homeless liaison must ensure that the youth is enrolled immediately in the school in which the youth seeks enrollment pending final resolution of the dispute (42 U.S.C. Section 11432 (g)(3)(E)(iv). While disputes are pending, students have the right to participate fully in school and receive all services for which they are eligible, as the definition of enrollment includes “attending classes and participating fully in school activities” (42 U.S.C. Section 11434a(1).
2. The school or local education agency (LEA) involved must provide the parent, guardian, or unaccompanied youth with a written explanation of any dispute-related decisions it makes Educ (42 U.S.C. 11432(g)(3)(E)(ii). Included in the LEA’s written explanation must be the reasons for its determination; information regarding the right of a parent, guardian, or unaccompanied youth to appeal; and time line for which to make an appeal; in a manner and form understandable to the parent, guardian, or unaccompanied youth(42 U.S.C. § 11432g)(3)(B)(iii)). In the case of an unaccompanied homeless youth, the homeless liaison must ensure that this written notice and policy is provided directly to the youth (42 U.S.C. 11432(g)(3)(B)(iv).
3. Upon determining that a McKinney-Vento dispute in eligibility, school selection, or enrollment exists, school staff must refer the parent, guardian, or unaccompanied homeless youth to the local McKinney-Vento liaison, who will carry out the dispute resolution process described in the State McKinney-Vento plan as expeditiously as possible after receiving the notice of the dispute (42 U.S.C. 11432(g)(3)(E)(iii).
4. If the dispute is not resolved by the homeless liaison, the parent, guardian, or unaccompanied homeless youth may file a complaint within ten (10) business days to the Superintendent or school director for further review. The superintendent or school director will provide a written explanation within ten (10) business days with the reasons for his or her determination.
5. If the dispute is not resolved by the superintendent, the parent, guardian, or unaccompanied homeless youth may file a complaint within ten (10) business days to the LEA board of education for further review. The LEA board of education will have thirty (30) calendar days to provide a written explanation with the reasons for its determination.
6. If the dispute is not resolved with the LEA board of education, it may be brought to the Missouri Department of Elementary and Secondary Education within ten (10) business days from receiving the LEA Board of Education’s written explanation for a State Level Appeal.

State Level Appeal

If the dispute is not resolved in a satisfactory manner at the LEA level, the dispute may be brought to the Missouri Department of Elementary and Secondary Education. Disputes made at the state level must be made in writing and sent via email or mailed within ten (10) business days from receiving notification of the LEA board of education’s decision, to:

State Homeless Coordinator
Federal Programs
P.O. Box 480
Jefferson City, Missouri 65102-0480

B. The complaint must include

1. a detailed description of the dispute;
2. the name(s) and age(s) of the children involved;
3. the name(s) of involved LEA personnel and the LEA(s) they represent; and
4. copies of the unresolved written resolutions from the LEA.

C. The state McKinney-Vento Homeless Coordinator will inform the involved LEA(s) of the dispute. The state McKinney-Vento Homeless Coordinator will gather needed information including documentation and statements of the parties and may conduct an independent investigation through an on-site visit if necessary.

D. Within thirty (30) business days of receipt of the complaint, the State McKinney-Vento Homeless Coordinator will inform the parties, in writing, of the decision.**

E. If a parent/guardian or unaccompanied youth disagrees with the state McKinney-Vento Homeless Coordinator's decision, the parent/guardian may, within 10 business days, appeal the decision to the Deputy Commissioner of Learning Services. This appeal must be in writing via email or mail and indicate why the parent/guardian or unaccompanied youth disagrees with the decision.

F. Within thirty (30) business days of receiving the appeal, the Deputy Commissioner of Learning Services will render a final administrative decision and notify the complainant and all other interested parties in writing.**

*The parties may mutually agree to an extension; however, every effort should be made to resolve the dispute in the shortest possible time.

**Although the standard procedure allows thirty (30) business days for a response, every effort will be made to resolve the dispute in the shortest possible time.

- Support for School Personnel (722(g)(1)(D) of the McKinney-Vento Act):
Describe programs for school personnel (including the LEA liaisons for homeless children and youth, principals and other school leaders, attendance officers, teachers, enrollment personnel, and specialized instructional support personnel) to heighten the awareness of such school personnel of the specific needs of homeless children and youth, including runaway and homeless children and youth.

The following efforts to build awareness of school personnel to the specific needs of homeless children and youth are undertaken by the MO-DESE and the state McKinney Vento Homeless Coordinator:

- The 2017-20 Homeless Children and Youth Grant Program Administrative Manual includes guidance on children who are runaways. Children who are runaways should be considered homeless even if their parents have provided or are willing to provide a home for them based on 1995 USDE issued non-regulatory guidance. The eligibility for runaway children and youth is covered as part of ongoing professional development provided by the Missouri Department of Elementary and Secondary Education. The Missouri Department of Elementary and Secondary Education provides guidance to LEAs that staff development activities should be provided for school personnel that are designed to heighten their sensitivity to the needs of homeless children and youth, the rights of such children and youth, and the specific educational needs of runaway and homeless youth.
- Posters explaining the educational rights of homeless children and youths are made available on the Missouri Department of Elementary and Secondary Education website. Posters have a space for each homeless liaison to provide his or her contact information.
- The McKinney-Vento Homeless Coordinator conducts at least two webinars per year and presents at a number of conferences (Governor's Council to End Homelessness, Continuum of Care, Department of Higher Education FAFSA Frenzy, Missouri Association of Student Financial Aid Personnel, Federal Programs Conference, DHSS School Nurses Conference, National Association for the Education of Homeless Children and Youth Conference, and the Conference on the Young Years) in order to raise awareness on topics relevant to the Education of Homeless Children and Youth (EHCY) Program.
- The state coordinator's office maintains a listserv dedicated to LEA homeless liaisons. The listserv is utilized to disseminate pertinent information about the EHCY Program and update liaisons about upcoming meetings, webinars, conferences, and program updates and legislative changes. MO-DESE posts an updated list of LEA homeless liaisons on MO-DESE's website at least twice per year. The updated list is also disseminated through the homeless education listserv. This list is also used to keep liaisons updated about upcoming meetings, webinars, conferences, web site changes and additions and program and legislative updates as needed throughout the school year.
- MO-DESE maintains a website dedicated to the EHCY Program. It contains information from recently attended trainings and workshops, district homeless liaison job responsibilities, Missouri best practices for homeless education, forms, federal and state guidance on homeless issues, homeless data, and other guidance pertinent to the EHCY Program. MO-DESE maintains an Administrative Manual for the Homeless Children and Youth Grant Program.

The manual provides guidance on the following: the EHCY grant program, the identification of homeless children and youths, responsibilities of the homeless liaison, school assignment and placement of homeless children and youth, school records, testing, immunization, comparable services, transportation, grant funding, staff development, data, and uses of local Title I funds. The manual is available on MO-DESE's website.

- MO-DESE is also in the developmental stages of a statewide professional development online tool, similar to the model being used in Michigan, which will be used to provide ongoing professional development training for the state's LEA homeless liaisons. MO-DESE will utilize the data from this system to provide targeted professional development based on LEA needs.

2. Access to Services (722(g)(1)(F) of the McKinney-Vento Act): Describe procedures that ensure that:
 - i. Homeless children have access to public preschool programs, administered by the SEA or LEA, as provided to other children in the State;
 - ii. Homeless youth and youth separated from public schools are identified and accorded equal access to appropriate secondary education and support services, including by identifying and removing barriers that prevent youth described in this clause from receiving appropriate credit for full or partial coursework satisfactorily completed while attending a prior school, in accordance with State, local, and school policies; and
 3. Homeless children and youth who meet the relevant eligibility criteria do not face barriers to accessing academic and extracurricular activities, including magnet school, summer school, career and technical education, advanced placement, online learning, and charter school programs, if such programs are available at the State and local levels.
- Access to Services (722(g)(1)(F) of the McKinney-Vento Act): Describe procedures that ensure that:

- i. Homeless children have access to public preschool programs, administered by the SEA or LEA, as provided to other children in the State;
- ii. Homeless youth and youth separated from public schools are identified and accorded equal access to appropriate secondary education and support services, including by identifying and removing barriers that prevent youth described in this clause from receiving appropriate credit for full or partial coursework satisfactorily completed while attending a prior school, in accordance with State, local, and school policies; and
- iii. Homeless children and youth who meet the relevant eligibility criteria do not face barriers to accessing academic and extracurricular activities, including magnet school, summer school, career and technical education, advanced placement, online learning, and charter school programs, if such programs are available at the State and local levels.

MO-DESE ensures Homeless children and youth and youth separated from public schools are identified and accorded access to preschool, secondary education, and academic and extracurricular programs through procedures that address resource development and training, monitoring, and collaboration.

Training

MO-DESE maintains and updates yearly an [Administrative Manual](#) for the EHCY Program. The manual contains information on identification of

homeless children and youths and youth separated from public schools, responsibilities of the homeless liaison, school assignment and placement of homeless children and youth, school records, testing, immunization, comparable services, transportation, grant funding, staff development, and use of local Title I funds.

Further, the manual addresses the requirement that students experiencing homelessness and youth separated from public schools in Missouri will not be segregated from their housed peers on the basis of their homelessness and are included in the appropriate educational programs, including advanced placement, magnet schools, summer school, compensatory educational programs for the disadvantaged, educational programs for the handicapped, programs for students with limited English language proficiency, career and technical education programs, programs for the gifted and talented, preschool programs, online learning, charter school programs and school meal programs.

The manual is specifically useful for LEAs applying for funds under the McKinney-Vento Act. However, from a broader perspective, the content of the Administrative Manual for the EHCY Program is the basis for periodic training provided to LEAs through webinars, regional workshops, and statewide conferences.

Monitoring

MO-DESE personnel, through the Tiered Monitoring System, monitor all LEA policies and procedures pertaining to homeless children and youths, identification of homeless children and youths, and the identification of the LEA's homeless liaison. These policies are not limited to but must address the requirements of access to preschool, secondary education, and academic and extracurricular programs.

Each LEA in the state of Missouri must have policies and procedures in place outlining how they identify and assess the educational needs of homeless children and youths and youth separated from public schools including removal of barriers to homeless students' education, which may include immediate enrollment, transportation, immunization, residency, records and guardianship.

Collaboration

The state homeless coordinator continues to collaborate with state social service agencies (through the Special Education Advisory Panel and State Interagency Coordinating Council) which includes providers of health, mental health, and child development series; preschool programs; community organizations; and other agencies to improve the provision of comprehensive education and related services to homeless preschool-aged children and their families. The state coordinator and the assistant

director of Missouri State Head Start Collaboration Office are participating members of the Governor's Task Force on Homelessness.

Preschool Specific Information

The SEA will provide ongoing training to ensure all LEAs are compliant with the school of origin inclusion for preschool students and to ensure that preschoolers experiencing homelessness have equal access to public preschool programs administered by the SEA and LEAs as provided to other children.

The SEA reviews and monitors preschool policies and practices of LEAs through the Tiered Monitoring System, including the requirement that LEAs ensure that homeless preschool-aged children are identified by school personnel. This includes children with disabilities under Part B of the IDEA or qualified students with disabilities under section 504 of the Rehabilitation Act of 1973.

LEAs are required to remove barriers to enrollment and retention for homeless children and youth separated from public schools including preschool students. For preschool students, LEAs must provide transportation to and from the child's school of origin at the request of the parent, or for unaccompanied youth, at the request of the liaison.

Secondary Specific Information

Missouri's state minimum graduation requirements are set by the State Board of Education. LEAs grant credit toward those requirements and have latitude in how those requirements are met. Whether through the traditional Carnegie Unit, transfer credit, or demonstrated mastery of content, students' progress toward graduation is based on local determinations. However, local policies regarding credit must be non-discriminatory in nature and applied uniformly to all students, including homeless children and youth.

The state provides non-regulatory guidance to LEAs regarding the conversion of transfer credit under some circumstances. For example, when students transfer between LEAs with significantly different schedule structures, LEAs (in order to be equitable to students as well as to maintain district graduation requirements) may transcribe credit through translation tables. Instances may include students transferring across four-, eight-, and ten-block schedules. Further, credit structures from other states may require multiplication or division of existing credit by comparing state graduation requirements. For example, an algebra class worth 10 credits in one state may translate to a single credit in Missouri. To recognize and accommodate these differences, LEAs are encouraged to establish a clearly written policy detailing how to manage such transfers when they occur.

Access to Academic and Extra Curricular Programs

As noted above, the administrative manual and ongoing monitoring emphasize the importance of equal and fair access to all programs for homeless children and youth and youth separated from public schools. LEAs are obligated to remove obstacles to enrollment, including uniform requirements, etc. Homeless children and youth and youth separated from public schools must be considered on a fair and equal basis for inclusion in all programs where they meet programmatic requirements.

4. Strategies to Address Other Problems (722(g)(1)(H) of the McKinney-Vento Act): Provide strategies to address other problems with respect to the education of homeless children and youth, including problems resulting from enrollment delays that are caused by—
 - i. requirements of immunization and other required health records;
 - ii. residency requirements;
 - iii. lack of birth certificates, school records, or other documentation;
 - iv. guardianship issues; or
 - v. uniform or dress code requirements.

Immunization and Other Health Records

Once LEA officials have determined that an enrolling student is homeless, the LEA's homeless liaison must assist the student in obtaining his/her education, immunization, medical, and other records. According to McKinney-Vento, the student must be enrolled in the interim. If the homeless liaison is unable to obtain prior immunization records within 30 days of enrolling and the student is still eligible for services under the homeless education program; the student must begin the immunization series and demonstrate that satisfactory progress has been accomplished within 90 days. If the homeless student maintains that he/she is exempted from receiving immunizations, then after thirty 30 days the student must provide documentation in accordance with the exemption requirements provided for in state statute § 167.181.3, RSMo.

Residency Requirements

Homeless children and youth are not subject to the same residency requirements as other students as defined in §167.020.2 and 3, RSMo.

School Records or Other Documentation

Once LEA officials have determined that an enrolling student is homeless, the LEA's homeless liaison must assist in the student in obtaining his/her education, immunization, medical and other records.

Uniform or Dress Code Requirements

The lack of school uniform or ability to meet other dress code requirements cannot delay the enrollment or attendance of homeless students in Missouri's LEAs. Once LEA officials have determined that an

enrolled student is homeless, the LEA's homeless liaison must assist the students (and their families) in obtaining the required uniform or provide assistance in meeting requirements related to the dress code. LEAs may use local funds to assist families or their Title I.A homeless set-aside funding to address these needs.

LEAs must have policies and procedures (adopted by the local board of education) that address any barriers homeless students may face related to enrollment, including the lack of school uniforms or ability to meet dress code requirements.

Other Services and Opportunities

Children and youths in homeless situations are entitled to services comparable to those offered to other students. These include, but are not limited to, services for children and youths with disabilities, programs for students with limited English proficiency, vocational and technical education programs, and programs for gifted and talented students. Children and youths who are homeless are also eligible for school nutrition programs sponsored by the U.S. Department of Agriculture and for services under Title I of the Elementary and Secondary Education Act that target students most at risk of failing in school.

5. Policies to Remove Barriers (722(g)(1)(I) of the McKinney-Vento Act): Demonstrate that the SEA and LEAs in the State have developed, and shall review and revise, policies to remove barriers to the identification of homeless children and youth, and the enrollment and retention of homeless children and youth in schools in the State, including barriers to enrollment and retention due to outstanding fees or fines, or absences.

The SEA monitors LEAs through the Tiered Monitoring of Federal Programs and reviews LEAs policies used to identify homeless children and youth. This includes a review of enrollment and retention policies for homeless children and youth. SEA staff also reviews policies and procedures concerning homeless students for any barriers to enrollment and retention due to outstanding fees, fines, or absences. Through the use of the Tiered Monitoring, LEAs are required to submit documentation to the SEA outlining the procedures that are used to survey the enrolled student body and how the LEA identifies those students who are homeless. Those identification efforts must be coordinated with school personnel and community agencies. LEAs are required to use student enrollment forms to help identify homeless students and are required to have ongoing communication and professional development with community partners in an effort to increase awareness of McKinney-Vento and help the LEA identify potentially homeless students.

6. Assistance from Counselors (722(g)(1)(K)): A description of how youths described in section 725(2) will receive assistance from counselors to advise such youths, and prepare and improve the readiness of such youths for college.

Every LEA in Missouri is required to have a staff member designated as the homeless liaison. Homeless liaisons advocate for youths described under 725(2). Among the advocacy duties are ensuring that students receive support from counselors and other school support personnel (school psychologists, social workers, etc.) to assist such youths to prepare and improve readiness for college.

School counseling programs are essential in the educational process and learning environments for all students in Missouri schools. School counselors plan an important role in crisis intervention in school districts and charter LEAs which includes providing services to students experiencing homelessness.

As part of the comprehensive school counseling program, school counselors work with all students, including those who are homeless and in foster care, on individual student planning. This includes setting personal goals, decision-making skills, course selection (including those required for entry into postsecondary institutions), and transitions (school to school including postsecondary education). Counselors provide advisement to homeless students specific to their needs about postsecondary readiness specifically navigating the costs and waivers of exam fees for AP, college entrance exams (ACT and SAT) as well as a waiver for application fees for students in need.

MO-DESE will create, in collaboration with the Missouri School Counselor Association, professional development opportunities for school counselors on the resources that are available to assist homeless youths and students in foster care as they prepare for the transition to postsecondary education. MO-DESE will also present information about assisting homeless students and students in foster care in the transition to postsecondary education at other education related conferences. Additionally, Missouri includes resource links from the Department of Higher Education on the School Counseling and Homeless webpages.

Appendix A: Measurements of interim progress

Instructions: Each SEA must include the measurements of interim progress toward meeting the long-term goals for academic achievement, graduation rates, and English language proficiency, set forth in the State's response to Title I, Part A question 4.iii, for all students and separately for each subgroup of students, including those listed in response to question 4.i.a. of this document. For academic achievement and graduation rates, the State's measurements of interim progress must take into account the improvement necessary on such measures to make significant progress in closing statewide proficiency and graduation rate gaps.

A. Academic Achievement

B. Graduation Rates

C. Progress in Achieving English Language Proficiency

Appendix A – Measures of Interim Progress

A: Academic Achievement

MO-DESE will evaluate, and revise if necessary, the goals and measures of interim progress as data from new assessments is available.

C: Long Term Goals and Measures of Interim Progress - Achieving English Language Proficiency

Progress to English Language Proficiency												
English Learners	2016	2017	2018	2018	2019	2020	2021	2022	2023	2024	2025	2026
	32.3%	35.6%	38.9%	42.2%	45.5%	48.8%	52.1%	55.4%	58.7%	61.0%	64.3%	67.6%

Table C outlines the percentage of students meeting progress toward proficiency expectations annually. Expectations for progress are defined below.

Expectations for Defining Progress

MO-DESE has established AEP to be an overall composite score of 4.7 on the ACCESS for ELLs 2.0, and that on average it should take ELs six years to achieve proficiency. With those goals in mind, MO-DESE has established measurements of interim progress toward the long-term goal by first establishing a baseline for each student depending upon their starting point on the AEP spectrum. The chart below provides interim progress measurements with the goal of AEP in six years.

Starting Grade	Year 0	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6	Year 7
KG	1	2.2	3	3.6	4.2	4.6	5	
1 st	1	2	2.8	3.6	4.2	4.6	5	
2 nd	1	2	2.8	3.6	4.1	4.5	4.9	
3 rd	1	1.9	2.8	3.4	3.9	4.4	4.8	
4 th	1	1.9	2.7	3.4	3.9	4.3	4.7	
5 th	1	1.8	2.6	3.3	3.7	4.1	4.5	4.9
6 th	1	1.8	2.6	3.3	3.7	4.1	4.5	Graduated
7 th	1	1.8	2.5	3.1	3.5	3.9	Graduated	
8 th	1	1.7	2.4	3	3.4	Graduated		
9 th	1	1.7	2.4	3	Graduated			
10 th	1	1.7	2.4	Graduated				
11 th	1	1.7	Graduated					

Progress to English Language Proficiency							
English Learners	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	2021-22
Less than four years	8.8%	9.8%	10.8%	11.8%	12.8%	13.8%	14.8%
Four or more years	10.7%	11.7%	12.7%	13.7%	14.7%	15.7%	16.7%

The two-factor EL index score credits schools in the following manner.

1. Progress to Proficiency: Schools are given up to 150 points based on this formula: Percentage of students meeting progress expectations multiplied by 150.
2. Attainment: Schools that meet the percentage of students attaining AEP (see Table D) are given 50 points.

Appendix B– Calculation of MAP Performance Index (MPI)

The **MAP Performance Index (MPI)** is used to develop scores within the Status metrics and to set academic achievement targets for LEA, school, and student group achievement. Student performance on tests administered through the MAP is reported in terms of four (4) performance levels (Below Basic, Basic, Proficient and Advanced) that describe a pathway to proficiency. The MPI is a composite number that represents the MAP assessment performance of every student by awarding points to each student based on the four performance levels and the student’s scale score. The points for all students in the LEA, school, or student group in a subject area are summed together, divided by the number of students in the group being measured and then multiplied by 100 rounded to the tenth. The result is the MPI for that group and subject. All assessment results from a single accountability year and for a single subject/content area are combined when generating the LEA, school, or student group MPI.

MPI Point Values

Numeric values are assigned to each of the achievement level scores as follows:

Performance Level	Index Point Value
Below Basic	1.0 – 2.99
Basic	3.0 – 3.99
Proficient	4.0 – 4.99
Advanced	5

Points are purposefully assigned to each performance level in a manner that prevents high performing students from masking or compensating for students still performing at the lowest levels. For example, a school earns the highest amount of points, five, for a student’s advanced score and the fewest amount of points, one, for a below basic score. While awarding the highest amount of points incents movement to the top, it cannot fully compensate for a student scoring at the lowest level. The mean of five + one is three; in Missouri’s proposed system, a three equates to Basic. A four represents Proficient.

MPI Example Calculation

Performance levels are provided by the testing companies for the total number of Reportable Students in each subject area. In the following example of a single content area for a grade 6 through 8 school, performance levels generated through the grade-level MAP, the MAP-A, and the EOC assessments may be utilized. To generate the MPI, the number of students in each performance level are multiplied by the Index Point Value. These products are then

summed, divided by the total number of reportable and multiplied by 100 then rounded to the tenth to produce the MPI which ranges from 100-500. The following example shows how the index is calculated in a single subject and school:

Step 1 – The number of students in each achievement level is determined for each year.

In the following example of a single content area for a grade 6-8 school, performance levels generated through the GLA and the Algebra 1 EOC are utilized to generate an MPI. The following example calculates the mathematics MPI of a fictitious school serving five students in grades six through eight.

Step 1 – Scale score ranges for each Performance Level are determined for each grade being measured. Scale scores below Cut Score 1 receive a Performance Level of Below Basic, scale scores equal to or above Cut Score 1 and below Cut Score 2 are Basic, scale scores equal to or above Cut Score 2 and below Cut Score 3 are Proficient, and scale scores equal to or above Cut Score 3 are Advanced.

Grade	Minimum Scale Score (Lower Bound for Below Basic)	Cut Score 1 (Lower Bound for Basic)	Cut Score 2 (Lower Bound for Proficient)	Cut Score 3 (Lower Bound for Advanced)	Maximum Scale Score
6	50	100	150	200	250
7	60	120	160	210	260
8	80	140	200	240	300
Algebra 1	50	75	100	125	200
These cut scores are fictitious, for illustration purposes only					

Table 14

Step 2 – Performance Levels are assigned to students according to their scale scores. DESE assigns a Performance Level Index Score to each reportable student according to where the student’s scale score falls in the range of total possible scale scores for the Performance Level. Index Scores are assigned in the following manner:

$$\text{Below Basic} = 1 + 2 \cdot (\text{Student Score} - \text{Minimum Scale Score}) / (\text{Cut Score 1} - \text{Minimum Scale Score})$$

$$\text{Basic} = 3 + (\text{Student Score} - \text{Cut Score 1}) / (\text{Cut Score 2} - \text{Cut Score 1})$$

$$\text{Proficient} = 4 + (\text{Student Score} - \text{Cut Score 2}) / (\text{Cut Score 3} - \text{Cut Score 2})$$

$$\text{Advanced} = 5$$

	Grade	Scale score	Performance Level	Performance Level Index Score
Student 1	06	125	Basic	3.5
Student 2	07	100	Below Basic	2.33
Student 3	07	150	Basic	3.75
Student 4	08	255	Advanced	5
Student 5	EOC	115	Proficient	4.6

Table 15

Step 3 – The Performance Level Index Scores for all students are added together, divided by the total number of reportable students, and multiplied by 100 (truncated to the tenth) to determine the MPI.

Reportable Students					MPI
(3.5+2.33+3.75+5+4.6)	/	5	=	3.836	*
				100	383.6

Table 16

Our analysis indicates that MPI is a valid and reliable measure of student achievement that accounts for performance at all levels.

Appendix C- Entry & Exit Criteria Data for English Learners

The following table shows how the current composite proficiency scores for all three sets of reclassification criteria correlate to the new scale.

Grade	ACCESS 1.0	ACCESS 2.0	Grade	ACCESS 1.0	ACCESS 2.0
1	4.7	4.0	7	4.7	4.2
	5.0	4.2		5.0	4.4
	6.0	5.0		6.0	5.0
2	4.7	3.9	8	4.7	4.2
	5.0	4.2		5.0	4.4
	6.0	4.9		6.0	5.0
3	4.7	4.0	9	4.7	4.2
	5.0	4.2		5.0	4.4
	6.0	4.9		6.0	5.0
4	4.7	4.0	10	4.7	4.2
	5.0	4.2		5.0	4.4
	6.0	4.9		6.0	5.0
5	4.7	4.1	11	4.7	4.1
	5.0	4.3		5.0	4.3
	6.0	5.0		6.0	4.9

Grade	ACCESS 1.0	ACCESS 2.0	Grade	ACCESS 1.0	ACCESS 2.0
6	4.7	4.2	12	4.7	4.1
	5.0	4.4		5.0	4.3
	6.0	5.0		6.0	4.9

The following boxplots display how Missouri ELs would have performed on the MAP ELA and mathematics tests in 2016. The horizontal line is the minimum score to be considered proficient on the content assessment. The final box in the chart, labeled EO, stands for English-only and refers to all non-ELs which may include former ELs and other language minority students.

Note: All students who scored a 5 or above in grade 3 were above proficient; many of them outscored the Non-ELs.

Note: All fourth graders who scored at a 5 or above scored proficient on LA MAP, while mathematics proficiency was somewhere in the 5 range.

Note: Proficiency in grade 5 was in the 5 range for both ELA and math.

Note: All students who scored a 5 or above in grade 6 were proficient in ELA. Proficient in mathematics was somewhere in the 5 range.

Note: All students who scored a 5 or above in grade 7 were proficient in ELA. Proficient in mathematics was somewhere in the 5 range.

Note: All students who scored a 5 or above in grade 8 were proficient in ELA. Proficient in mathematics was somewhere in the 5 range.

The following is a similar boxplot, only using the scale for ACCESS 1.0 from 2015.

After converting scale score ranges for 2015, similar trends can be seen. For all ELA scores and all but grades 5 and 7 mathematics, content proficiency was somewhere in the 5 range. If one were to translate the 1.0 scale to the 2.0 scale, proficiency would be between 4.2-4.9 in grades 3-4, 4.3-4.9 in grade 5, 4.4-4.9 in grade 6, and 4.4-5.0 in grades 7-8.

Finally, the following chart shows how many students earned a score at each WIDA level prior to and after the standards setting.

	1	2	3	4	5	6
ACCESS 1.0	2654	3335	6604	8095	6863	2522
ACCESS 2.0	3264	4411	11521	8383	2208	284

Appendix D - Description of Missouri Growth Model

Standard 1 & 2: Academic and Subgroup Achievement

Conceptual Overview

The Missouri Growth Model used in the state’s LEA and school accountability framework is a regression-based statistical analysis of the observed relationships between prior and current year scores on the MAP exam. The statistical analysis is conducted in two steps.

The first step predicts MAP scores for individual students tested in the current year based on their prior year scores, and the average prior year scores for all students tested in their school and LEA, along with a few other variables described in more detail below.⁷ The difference between the observed score and predicted score for each student (the student’s residual) is the key value derived from the first-stage regression. Positive residuals indicate the student did better than predicted and negative residuals indicate the student’s score was lower than predicted.

⁷ The inclusion of both school and LEA-level average prior year scores is a model refinement implemented in 2018. In previous years, LEA-level averages were included in the first-stage model when estimating LEA growth and school-level averages were included when estimating school growth.

The second-stage regression then groups students' residuals by LEA or school, and provides an average growth measure for each LEA or school, with a standard error that is used to evaluate the statistical significance of the resulting measures.

Procedural Overview for Calculating MSIP Standard 1 Growth Measures

The following steps are conducted each year to estimate the Missouri Growth Model.

1. Standardize current year MAP scores
2. Construct score pairs for each student from current year and prior year MAP scores
3. Add data for other regression variables to the score pairs
4. Run stage 1 regressions and retrieve student residuals
5. Combine current year residuals with residuals from prior two years and run stage 2 regressions
6. Test average growth measures for statistical significance, then convert them to LEA- or school-level standard deviation units and percentiles for presentational purposes

Each step in this procedure is described in more detail below.

Step 1 – Standardize current year MAP scores

All MAP score records with a scale score from the most recent testing year are retrieved and sorted by grade and subject. The mean and standard deviation for each subject and grade combination are calculated and used to convert the observed scale score values to z-scores. The z-score for a scale score in subject_s and grade_g is calculated using the following formula:

$$Z_{sg} = \frac{(\text{Observed Score} - \text{Mean Score}_{sg})}{\text{Standard Deviation}_{sg}}$$

Conceptually, the z-score is a measure of how much a score differs from its sample mean, and is measured in standard deviation units. For example, a z-score of 1 indicates a scale score one standard deviation above the mean (roughly the 84th percentile) for the grade and subject, while a z-score of -1 indicates a scale score one standard deviation below the mean (roughly the 16th percentile) for the grade and subject. Using standardized scores allows combining scores with different scales in statistical analyses. Scale scores are standardized each year for the subject and grade level combinations shown below in Table 90.

Subjects and grade levels where z-scores are calculated from MAP scale scores

English Language Arts		Math	Algebra I ⁸
3		3	
4		4	
5		5	
6		6	
7		7	7
8		8	8

Table 58

Step 2 – Construct score pairs for current year MAP scores

⁸ Separate regressions are run for students in grade 7 or 8 who have an Algebra I End of Course exam score, so the mean and standard deviation for grade 7 Algebra I test takers are used to standardize the 7th graders’ Algebra I scores and the mean and standard deviation for grade 8 Algebra I test takers are used to standardize the 8th graders’ Algebra I scores. Note that students with Algebra I EOC scores are NOT included in the regressions for the grade 7 and grade 8 math scores.

A valid score pair for a student is a MAP score from the current year linked with a MAP score from the prior year in the same subject and prior grade level. The first score pairs available are constructed by matching grade 4 scores from the current year with grade 3 scores for the same student and subject from the prior year. The last score pairs available have grade 8 scores matched to prior year, grade 7 scores, for the same student and subject.⁹

All matches are evaluated to make sure the grade from the prior year is one grade less than the grade for the current year. Cases where grade-level progression is not as expected are dropped (e.g., when a student is tested in the same grade two years in a row, or appears to have skipped a grade between years).

Step 3 – Add data for other regression variables to score pairs

The following variables are added to the records to be analyzed in the stage 1 regression.

- Student’s prior year MAP score from the “other” subject. For example, if math is the subject being analyzed, then the prior year score from English language arts is added to the variables used to predict the current year math score; conversely, when growth is being estimated for English language arts, the prior year math score is the “other subject.”¹⁰ The other subject information is included as it improves the model’s predictive ability. For example, if two students have the same prior year score in math, the model can leverage differences in prior year performance in communication arts to determine which student is predicted to score higher on the current year Math exam.
- An indicator variable changed from 0 to 1 when the student was in the school where tested less than a full academic year.
- The prior year average score in the same subject and the “other” subject for the school and LEA where the student was tested, calculated for all students who were tested in the school and LEA in the current year.
- The percent of students in the school and LEA who are flagged who were in the school where they took their MAP test less than a full academic year.
- The percent of students in the school and LEA with missing off-subject scores.

Step 4 – Run stage 1 regressions and retrieve residuals

⁹ Students with Algebra I EOC scores in grade 7 or 8 are matched to prior year math scores from the prior grade. This means grade 7 Algebra I EOC scores are predicted by prior year grade 6 math scores and grade 8 Algebra I EOC scores are predicted by prior year grade 7 math scores.

¹⁰ Students MUST have a prior year score from the same subject to be included in the growth model. However, those with a missing prior year “other” subject score are kept. The other subject score is set to the state mean z-score of zero, and a variable indicating that the other subject score is missing is set to 1. We also include an interaction term to allow the same-subject prior-year score to have more predictive weight in the case of missing other subject data. This method allows students with missing other subject scores to be kept in the stage 1 regression, while leveraging the available information to produce the best prediction possible.

A separate regression model is fit for each subject and grade combination, with the student's current year score as the outcome variable, and the student's prior year scores, and the variables listed under item 3 above, as predictor variables. There are five regressions run in English language arts and seven regressions run in math every year. Residuals from these regressions are calculated and saved with the LEA and school identifiers indicating where the student was tested in the current year.

Step 5 – Combine current year residuals with residuals from prior two years and run stage 2 regressions

All residuals for a subject from the current and prior two years are combined into a single data set and analyzed using a regression model that includes only school or LEA IDs as the predictor variables. When the predictor variable is LEA ID, then the stage 2 regression produces the average residual in a subject for each LEA based on all students tested in the LEAs over three years. When the predictor variable is school ID, then the stage 2 regression produces the average residual in a subject for each school based on all students tested in the schools over three years.¹¹

Step 6 – Test average growth measures for statistical significance and convert them to LEA- or school-level standard deviation units and percentiles for presentational purposes.

The student level residuals and the average residuals for LEAs and schools are initially reported in student-level exam score units. For example, a LEA-level English language arts measure of 0.07 means that, on average, students in the LEA scored 0.07 standard deviations higher than predicted on the MAP English language arts exam. The stage 2 regression results also include a t-statistic for each unit analyzed (LEA or school) that allows for determining if the average of student residuals in the unit is reliably distinguishable from zero. Average residuals greater than zero and statistically significant indicate that, on average, MAP performance of students in the unit exceeded predicted performance in a statistically meaningful way. Average residuals less than zero and statistically significant indicate that, on average, MAP performance of students in the unit was below predicted performance in a statistically meaningful way. Average residuals that are not statistically significant cannot be reliably distinguished from zero, indicating that, on average, students' MAP performance in the unit was not reliably different from predictions.

Two additional conversions are also applied to the LEA- and school-level estimates. The first conversion takes the initial estimates measured in student exam score units and converts them to LEA (or school) level standard deviation units. For these measures, a value of 0.86 indicates that the LEA performed 0.86 standard deviations higher than the average LEA in the state in terms of student exam score growth in the relevant subject, while a measure of -0.52 indicates that the LEA performed -0.52 standard deviations lower than the average LEA in the state. The second conversion presents the same information in LEA (or school) level percentile measures. Here, a value of 65 indicates that the LEA is in the 65th percentile of LEAs in the state with respect to student exam score growth.

¹¹ The standard errors of the stage 2 model are clustered at the student-level to account for repeated student observations over time. In addition, post-estimation Bayesian shrinkage methods are applied to the school and LEA estimates to account for varying degrees of noise across LEAs and schools.

As a final note, it is important to realize that the various conversions described above are purely presentational in nature and have no impact on the estimation of the LEA (or school) effects, nor on their statistical significance.

Student Group Growth Measure Calculation

To produce Student Group growth measures, steps 5 and 6 from the above process are repeated using only student residuals from students identified as belonging to that student group. A student is identified as a member of the group if their MAP exam score records indicate the student is Black, Hispanic, direct certified (free lunch program), speak English as a second language, or receive special education services.¹² In addition, prior to step 6, the Student Group growth measures at each level (LEA or school) are re-centered to have an overall mean of 0. The re-centering modifies the interpretation of the average residual, so that a positive and statistically significant estimate indicates, relative to model predictions, Student Group students in the LEA or school are, on average, out-performing the Student Group students in other similar LEAs or schools across the state.¹³ Similarly, a negative and statistically significant estimate indicates, relative to model predictions, Student Group students in the LEA or school are, on average, under-performing Student Group students in other similar LEAs or schools.

¹² With the implementation of MSIP6, Free and Reduced Lunch (FRL) eligibility will be replaced with direct certification (from Social Services) of free lunch eligibility as a super-subgroup criterion.

¹³ This is an additional model refinement introduced in 2018. In prior years, the super-subgroup measures were re-centered in such a way that the unit's super- subgroup students were compared to the average non- super-subgroup students in the state and provided a measure of achievement gap closing across student subgroups.

Appendix E - Levels of Leadership Development System Evaluation

Evaluation Levels	...to answer the question(s)...	...as evidenced by	Information used to...?
Level One: Satisfaction with training	- Was the training useful? - Was the time well spent? - Did the trainer know the content? - Did the presenter deliver effectively? - Was the setting conducive to learning? - Was the training implemented the same way and with fidelity from site to site? - Was it delivered to the appropriate participants?	- Participant sign-in forms - Survey data collected at the end of the training - Informal questions throughout the training - Exit tickets	- Improve participant selection - Improve the quality of training content/materials - Improve the training delivery - Inform revisions of the training design
Level Two: Learning from the training	- Did principals learn the intended content? - Can principals demonstrate relevant skills? - Did principals support to other principals? - Did training address principal concerns?	- Surveys collected prior/post training - Information on chart pads/handouts - Role playing activities - Use of exit tickets	- Improve training content - Improve delivery of content - Improve format/structure - Document near term impact
Level Three: District/school support and change	- Was there support from central office/superintendent for implementation? - Were needed resources provided? - Did changes occur to the school's structure? - Did the training inform school climate change?	- Follow-up surveys 3-4 weeks after training - Follow-up questions from trainers at the next training - Structured interviews or focus groups with principals, teachers or central office - Surveys with teachers, parents or students	- Provide feedback to central office/superintendent - Document system support - Develop training for central office/superintendent - Inform working conditions

Level Four: Use of knowledge and skills	• Are principals able to apply the new knowledge? • Are principals able to demonstrate new skills? • Do principals demonstrate mastery of appropriate competencies?	• Structured interviews with principals 3-4 weeks after to gather principal reflections • Direct observation of principals • Feedback from central office/superintendents	• Document application of knowledge and skills • Improve train/implement • Inform CO/superintendent evaluation
Level Five: Increased effectiveness of teachers	• Did teacher effectiveness improve? • Is there evidence of a change in culture? • Is there an increase of teacher morale? • Has effective teacher retention increased? • Were effective intervention/supports applied?	• An increase in teacher performance based on evaluation data • Changes in culture from climate surveys • School data on teacher retention • Improvement plan data on interventions	• Inform revisions to design, implementation and format • Develop growth plans • Inform school PD process • Assess overall impact of Leadership Development System
Level Six: Improved student learning	• Was there a positive, statistically significant, change in student growth data? • Does school culture/climate support students' physical or emotional well-being? • Did dropout rates or absenteeism decrease? Did graduation rates increase?	• Data contained in student records • Data contained in school records • Structured interviews with students, parents and/or administrators • Parent and student surveys	• Inform revisions to design, implementation and format • Inform student services • Assess overall impact of LDS • Inform continued rollout and implementation

Guskey’s Five Critical Levels of Professional Development Evaluation, Guskey, 2002

Appendix F: Teacher Evaluation Summative Report

Date: _____

Teacher: _____ Probationary: _____ Permanent: _____

School: _____ Subject: _____ Academic Year: _____

Standard 1: Content Knowledge Aligned with Appropriate Instruction	Meets Expectation	*Growth Opportunity	**Area of Concern
Description: The teacher effectively plans for the delivery of the essential content of the discipline; subject matter learning activities are meaningful and engaging for students; and students demonstrate mastery and application of content.			
Standard 1 Comments:			
Standard 2: Student Learning Growth and Development	Meets Expectation	*Growth Opportunity	**Area of Concern
Description: The teacher uses research-based practices and student information to design meaningful lessons; the teacher's instructional strategies use current theories of growth and development, including assisting students in goal setting; and students' level of growth and development is the foundation for new learning.			
Standard 2 Comments:			
Standard 3: Curriculum Implementation	Meets Expectation	*Growth Opportunity	**Area of Concern
Description: The teacher designs lessons aligned with state and district standards; the teacher facilitates student learning based on state and district standards; and students master essential learning objectives based on state and district standards.			
Standard 3 Comments:			
Standard 4: Critical Thinking	Meets Expectation	*Growth Opportunity	**Area of Concern
Description: The teacher's lesson design and use of instructional resources promotes critical thinking; the teacher's instructional strategies promote critical thinking and problem-solving; and students demonstrate their ability to think critically and problem-solve.			
Standard 4 Comments:			
Standard 5: Positive Classroom Environment	Meets Expectation	*Growth Opportunity	**Area of Concern
Description: The rules, routines and structures in the classroom create an environment conducive to learning; the teacher's strategies create a positive classroom environment conducive to learning; and students are self-directed, exhibit positive relationships and are engaged in learning.			
Standard 5 Comments:			
Standard 6: Effective Communication	Meets Expectation	*Growth Opportunity	**Area of Concern

Appendix F: Teacher Evaluation Summative Report

Date: _____

Description: The non-verbal communication (written/electronic) offered is effective, correct and appropriate; the teacher demonstrates correct and appropriate communication; and students exhibit correct and appropriate communication.			
Standard 6 Comments:			
Standard 7: Student Assessment and Data Analysis	Meets Expectation	*Growth Opportunity	**Area of Concern
Description: The teacher maintains accurate data on each student's progress based on multiple data points; the teacher effectively collects and uses student data to inform and improve instruction; and students are knowledgeable of their own progress and plan personal learning goals.			
Standard 7 Comments:			
Standard 8: Self-Assessment and Improvement	Meets Expectation	*Growth Opportunity	**Area of Concern
Description: The teacher maintains a professional growth plan to document the application of new knowledge and skills; the teacher engages in professional learning to improve practice and increase student learning; the teacher follows district policies and procedures regarding ethical practices & responsibilities; and the teacher maintains positive relationships with students, staff, parents, patrons, administrators, and supervisors.			
Standard 8 Comments:			
Standard 9: Professional Collaboration	Meets Expectation	*Growth Opportunity	**Area of Concern
Description: The teacher engages with colleagues to promote the district/school vision, mission and goals and works collaboratively regarding improvements in student learning and well-being.			
Standard 9 Comments:			

*A "Growth Opportunity" rating on a standard "may result" in a Growth Plan for that area.

**An "Area of Concern" rating on a standard results in an Improvement Plan for that area.

Appendix G - Equity Plan Data Chart

- **Group 1**—Highest Minority schools (261 schools). Non-White students and Hispanics of any race
- **Group 2**—Highest FRPL of schools (261 schools). Students eligible for Free/Reduced lunch
- **Group 3**—Title I Schools (1206 schools: Targeted (257) or Schoolwide (949))
- **Group 4**—Most Rural Schools (353 schools). NCES Urbanicity Classification “Rural: Remote”
- **Group 5**— Non-Title Schools (1036 Schools)
- **Group 6**— Lowest FRPL of schools (261 schools). Students eligible for Free/Reduced lunch

The data and related discussion to follow draw upon the most recent data available. In most cases, the data correspond to the 2015-16 school year. The “Definitions” section below indicates specific exceptions to this rule where applicable, as well as cases in which multiple years were combined.

All Missouri public elementary and secondary schools are included in the analysis.

To assist with interpreting the data contained in the chart, the following definitions and information are offered for each of the measures in the table:

***Poor student:** A student eligible for a free or reduced priced lunch (FRPL). The 261 schools with the highest rates of FRPL students (100 percent) are referred to as “high-poverty” schools. These are compared with the 261 schools with the lowest rates of FRPL students (0 – 21.7 percent), referred to as “low-poverty” schools. (DESE database [dbo].[SUMMARY_BUILDING_DEMOGRAPHIC])

***Rural: Remote:** Census-defined rural territory that is more than 25 miles from an urbanized area and also 10 miles from an urban cluster. The “rural: remote” designations used in this plan were extracted from the National Center for Education Statistics’ Elementary/Secondary Information System (ELSI) and correspond to the 2015-16 school year (most recent available data). Schools that meet these criteria are referred to as “rural schools”. (DESE database [dbo].[NCES_STATISTICS_DISTRICT])

***Minority:** Non-white students, including Hispanic of any race. 261 schools with the highest average (91.4 percent) of minority students are referred to as “high-minority” schools. (DESE database [dbo].[SUMMARY_BUILDING_DEMOGRAPHIC])

***Discipline rate:** The number of incidents divided by the number of students (incident is when a student is removed from the regular classroom half (1/2) a day or more). (DESE database [dbo].[SUMMARY_BUILDING_DISCIPLINE])

***Retention rate:** Percent of teachers retained from 2015 to 2016 (one-year retention rate), or from 2013 to 2016 (three-year retention rate). A teacher is considered to be retained if, in 2014, he or she remained employed as a teacher in the same school where he or she was employed in either 2015 (for the one-year analysis) or 2013 (for the three-year analysis). (DESE database [dbo].[EDUCATOR_CORE] / [dbo].[EDUCATOR_SCHOOL])

***Absenteeism:** A teacher is absent if he or she is not in attendance on a day in the regular school year when the teacher would otherwise be expected to teach students in an assigned class. This includes both days taken for sick leave and days taken for personal leave. Personal leave includes voluntary absences for reasons other than sick leave. This does not include administratively approved leave for professional development, field trips or other off-campus activities with students. Absenteeism data were extracted from the U. S. Department of Education’s 2012-13 Civil Rights Data Collection (CRDC).

***Inexperienced teacher:** A first- year teacher. (DESE database [dbo].[EDUCATOR_CORE])

***Less than fully qualified** (for the statutory term “unqualified”) – A teacher who meets one or more of the following criteria: (DESE database [dbo].[HQT_APPROPRIATE_CERT])

- Is teaching on a provisional certificate
- Is teaching on a temporary authorization certificate
- Is lacking the necessary credential to be considered appropriately certified for at least one teaching assignment

***Out-of-field:** A teacher who is considered inappropriately certified by virtue of teaching a subject that does not correspond to one or more of the teacher’s active certifications. (DESE database [dbo].[HQT_APPROPRIATE_CERT])

***Effective Index:** An average overall rating of the general collective effectiveness of the teachers in a school. Since MO-DESE does not mandate a single evaluation model for all LEAs, an index was developed to summarize aggregate teacher effectiveness ratings for each school in the most consistent manner possible. On Screen 18a of Core Data, an annual data collection by MO-DESE that occurs at the end of the school year, LEAs submit the number of teachers evaluated that year within each of the summative performance levels used in the local evaluation system. The data are reported in order of increasing effectiveness. The number of teachers in each level is assigned a point value equal to the rank position of the level. The total point value of the teachers’ collective ratings is then divided by the maximum points possible based on the parameters of the local system. For example, in a five-level system in which 10 teachers were evaluated, the maximum point value possible would be 50 ($10 \times 5 = 50$). If each teacher were rated at the second highest effectiveness level, that collective effectiveness would be worth 40 points ($10 \times 4 = 40$). In this situation, the index would be calculated at .80 ($40/50 = .80$). (DESE database [dbo].[DC_EDUCATOR_EVALUATION])

According to a number of measures contained in the table, these data suggest that the learning experience of students in high-poverty, high-minority and rural schools compared to students in low-poverty schools is quite different. High-poverty, high-minority and rural students appear to learn from less-experienced, unqualified, out-of-field, or less-effective teachers at higher rates than occur in low-poverty schools.

Appendix H – Glossary

ABCTE	American Board for Certification of Teacher Excellence
AEP	Academic English Proficiency
APR	Annual Performance Report
APR-EPP	Annual Performance Report for Educator Preparation Programs
ASI	Area Supervisor of Instruction
Consolidated Plan	Consolidated State Plan for the Every Student Succeeds Act (ESSA)
CCSSO	Council of Chief State School Officers
Department	United States Department of Education (ED or USED)
DESE or MO-DESE	Missouri Department of Elementary and Secondary Education
EL	English Language Learners
ELA	English language arts

SSOS	Statewide System of Support
Title	One of the nine sections included in Consolidated State Plan
WIDA	World-class Instructional Design and Assessments

Appendix I: Section 427 of the General Education Provisions Act (GEPA)

Instructions: In the text box below, describe the steps the applicant proposes to take to ensure equitable access to, and participation in, its Federally-assisted program for students, teachers, and other program beneficiaries with special needs provide the information to meet the requirements of Section 427 of the General Education Provisions Act (GEPA), consistent with the following instructions.

Missouri's Outstanding Schools Act (OSA) addressed educational equity by requiring changes to the foundation formula which applies a base of support for all schools in the State. The Act also required schools to set aside a percentage of their foundation formula funds for professional development activities to support the continuous improvement of all educators. To support districts in this requirement, Regional Professional Development Centers have been established throughout the state and are accessible to all educators.

Technology is also an important tool for promoting equity providing shared educational data, information, training, and research. Technology also allows for alternative education opportunities for economically disadvantaged, limited English, homebound, and geographically isolated students.

Districts are required to annually disaggregate and review achievement scores and dropout rates by race/ethnicity, gender, and disabilities. Districts are also encouraged to disaggregate and review data in other areas, such as special programs, attendance rates, retentions/suspensions/expulsions, etc., changes in instruction and assessment necessitated by the State's performance standards and assessments. This will promote successful learning for all students.

To ensure equitable access to and participation in federally funded, state-level activities for schools, students, teachers, and other beneficiaries with special needs, the Department will take the following steps. These measures will address equitability based on: gender, race, national origin, color, age, disability, or other categories which may be identified.

1. All districts, regardless of size or resources, receive state funding.
2. The Department has transitioned grants to a uniform application and application process for districts and provides technical assistance to help them develop and submit approvable applications.
3. All applicants must assure that they will take all reasonable measures to ensure equitable access to and participation in the project.
4. State assessments are structured to address all student needs.
5. Documents are translated, at the state and/or local level, into other languages and formats as needed.
6. All meetings, workshops and conferences sponsored by the Department are located in accessible facilities.
7. The Department conducts diversity training for all staff.
8. Meeting notices always carry a clause regarding accessibility for individuals with disabilities.

At the local level, each district will assure equitable access to and participation in federally assisted programs as part of its overall assurances.
